Objective and Investment Policy

Investment Objective

The aim of this Fund is to provide long-term capital growth over a period of 5 years or more.

Investment Policy

The Fund invests in shares of listed companies engaged in the research, design and development of technologies in all sectors including IT and the internet which the fund manager believes will provide above-average returns. The Fund invests in companies of any size which can be based anywhere in the world, albeit the Fund tends to be biased towards the US as this is where the majority of technology related companies are based. The fund manager selects shares based upon analysis of a company's financial status, quality of its management, expected profitability and prospects for growth.

The fund manager has full discretion to select investments for the Fund in line with the above investment policy and in doing so may take into consideration the MSCI World Information Technology index. The MSCI World Information Technology index is designed to measure the performance of the large and mid-cap segments across a number of developed markets as selected by the index provider. This index best represents the types of companies in which the Fund makes the majority of its investments.

This Fund is actively managed in reference to the MSCI World Information Technology index, which may be used by investors to compare the Fund's performance.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives and securities lending) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Single Sector Risk: as this Fund is invested in a single sector, the Fund's value will be more closely aligned with the performance of that sector and it may be subject to greater fluctuations in value than more diversified funds.

Currency Risk: the Fund holds investments denominated in currencies other than the base currency of the Fund. As a result, exchange rate movements may cause the value of investments (and any income received from them) to fall or rise affecting the Fund's value.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.
