Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

GAM Star China Equity

hereafter the "Fund", a sub-fund of GAM Star Fund p.l.c.
Inst Acc - GBP (the "Share Class") **ISIN: IE00B3CTFS84**
Manager: GAM Fund Management Limited part of GAM Group AG.

Objectives and investment policy

- The investment objective of the Fund is to achieve long term capital appreciation.
- The Fund seeks to achieve this objective by investing primarily in equities (e.g. shares) and equity related securities (e.g. warrants) listed on any Recognised Market which are issued by companies with principal offices or significant business activities in the People's Republic of China and Hong Kong.
- The Fund may invest in China A shares listed on or dealt in the Shanghai Stock Exchange or the Shenzhen Stock Exchange. Investments will be made either via the Renminbi Qualified Foreign Institutional Investor ("RQFII") regime or via the Shanghai Stock Exchange using the Shanghai Hong Kong Stock Connect or Shenzhen Stock Exchange using the Shenzhen Hong Kong Stock Connect. Up to 30% of net assets may be invested in China A shares.
- The fund manager adopts a fundamental stock-picking approach with a macro overlay. There is a bias to mid-caps where coverage is poor.
- The Fund promotes environmental and/or social characteristics in accordance with Article 8 of Regulation (EU) 2019/2088 ("SFDR") but does not have sustainable investment as its objective.
- The Fund is considered to be actively managed in reference to MSCI China 10/40 (the "Benchmark") by virtue of the fact that it uses the Benchmark in the appropriate currency for performance comparison purposes. However the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.
- Shares in the Fund can be bought and sold daily (every Business Day of the Fund).
- The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.
- Any income arising from this Share Class will be accumulated. Other share classes of the Fund may distribute income.
- The fund manager has discretion in managing the investments of the Fund.
- The Fund may use a limited number of simple derivative instruments for efficient portfolio management purposes. Further information on the Fund's use of derivatives can be found under the Derivatives section within the Fund's Supplement. Although the use of derivatives may give rise to an additional exposure any such additional exposure will not exceed the Fund's Net Asset Value.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within seven years.

Risk and reward profile

Lower risk — **Higher risk**

Lower reward potential — **Higher reward potential**

1	2	3	4	5	6	**7**

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- The Fund is assigned to the above category based on its historical fluctuations in value.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently from in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Liquidity Risk:** some investments can be difficult to sell quickly which may affect the value of the Fund and, in extreme market conditions, its ability to meet redemption requests.
- **Shanghai-Hong Kong Stock Connect / Shenzhen Connect Risk:** The Fund may be investing in China A Shares via the Shanghai – Hong Kong Stock Connect / Shenzhen Connect which may entail additional clearing and settlement, regulatory, operational and counterparty risks.
- **Single Country Risk:** investment in companies of a single country may be subject to greater political, social, economic and tax risks and may be more volatile than investments in more broadly diversified funds. Local tax law may change retrospectively and without notice.
- **Special Country Risk / China:** changes in China's political, social or economic policies may significantly affect the value of the Fund's investments. China's tax law is also applied under policies that may change without notice and with retrospective effect.
- **Onshore Renminbi Currency Risk:** Currency control decisions made by the Chinese government could affect the value of the fund's investments and could cause the fund to defer or suspend redemptions of its shares.
- **Currency Risk - Non Base Currency Share Class:** non-base currency share classes may or may not be hedged to the base currency of the Fund. Changes in exchange rates will have an impact on the value of shares in the Fund which are not denominated in the base currency. Where hedging strategies are employed, they may not be fully effective.
- **Capital at Risk:** all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed.
- **Equity:** investments in equities (directly or indirectly via derivatives) may be subject to significant fluctuations in value.
- **Market Risk / Emerging Markets:** emerging markets will generally be subject to greater political, market, counterparty and operational risks.
