Jupiter Investment Grade Bond Fund I GBP Acc (GB00B1XG8R44)

A sub-fund of Jupiter Investment Management Series I.

Managed by Jupiter Unit Trust Managers Limited.

Objectives and Investment Policy

Objective: to seek to achieve income and capital growth by delivering a return, net of fees, greater than that of the ICE BofAML Sterling Non-Gilt Index over rolling 3 year periods.

Policy: the Fund invests primarily (at least 70%) in bonds and similar debt investments issued by companies anywhere in the world.

The Fund will typically invest at least 80% in investment grade bonds and similar debt investments (e.g. bonds with a minimum credit rating of BBB- as rated by Standard and Poor's or Baa3 by Moody's).

For those investments not denominated in British Pounds, the Fund may use techniques to try to reduce the effects of changes in the exchange rate between British Pounds and other currencies (i.e. hedging). This aims to protect the Fund against losses caused by currency movements between the Fund's base currency, British Pounds, and the currency of the underlying assets of the Fund.

The Fund may hold investments with loss-absorbing features, including up to 10% in contingent convertible bonds (CoCos).

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment), with the aim of generating returns (i.e. for investment purposes) and/or reducing the overall costs and risks of the Fund.

The Fund is actively managed. Portfolio construction is driven by an on-going assessment of the drivers of returns such as interest rates, bond prices, economic outlook, inflationary expectations and global political issues. This will also include an assessment of issuers' default risk and value relative to similar bonds in the market.

The ICE BofAML Sterling Non-Gilt Index is a broad representation of the Fund's investment universe and as such is a point of reference against which the performance of the Fund may be measured. Although a large proportion of the Fund's investments may be components of the Index, the Fund has the ability to deviate significantly from the Index.

Portfolio transaction costs are paid out of the assets of the Fund in addition to the charges set out below, and may have an impact on the performance of the Fund.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Treatment of income: as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

Dealing: you can generally buy and sell shares on any day on which the London Stock Exchange is open for normal business – please refer to the Prospectus for exceptions.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls). Funds in category 4 have in the past shown moderate volatility. With a fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.
- **Interest Rate Risk** - The Fund can invest in assets whose value is sensitive to changes in interest rates (for example bonds) meaning that the value of these investments may fluctuate significantly with movement in interest rates.e.g. the value of a bond tends to decrease when interest rates rise
- **Pricing Risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- **Contingent convertible bonds** - The Fund may invest in contingent convertible bonds. These instruments may experience material losses based on certain trigger events. Specifically these triggers may result in a partial or total loss of value, or the investments may be converted into equity, both of which are likely to entail significant losses.
- **Credit Risk** - The issuer of a bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due.
- **Market Concentration Risk (Geographical Region/Country)** - Investing in a

particular country or geographic region can cause the value of this investment to rise or fall more relative to investments whose focus is spread more globally in nature.

- **Derivative risk** - the Fund may use derivatives to generate returns and/or to reduce costs and the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment.
- **Counterparty Risk** - the risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- **Charges from capital** - Some or all of the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.
- For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	0.65%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

- These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.
- The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser or distributor.
- The ongoing charges figure is based on the fixed annual charge as detailed in the prospectus. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- You can find out more details about the charges by looking at Schedule 1 of the prospectus.
