

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London UK All Share Tracker Fund (Accumulation - Class Z Shares)

A sub-fund of Royal London Equity Funds ICVC ISIN: GB00B533V415
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve over the long term (at least 7 years) the capital growth and income (1) of the FTSE® All-Share Total Return GBP Index (the "Index").

This is carried out principally by matching the performance of the Index, which is regarded as a good measure of the share-price performance of the approximately 600 largest UK companies listed on the London Stock Exchange.

Policy The Fund will invest at least 70% of its assets in shares of companies that belong to the Index. The Fund's manager, however, will typically invest around 90% of the Fund's asset in companies that belong to the Index.

The Fund uses an optimised portfolio approach aimed at maximising return while controlling risk. This means that, while the Fund aims largely to replicate the composition of the Index, the manager may decide not to hold all constituents of the Index, particularly if they have poor liquidity (where the money invested is not easily accessible), or if they are expensive to trade. The manager may also choose not to hold constituents in the exact benchmark weights of the Index.

The Fund is permitted to invest in stocks that were once held in the Index, but have since been replaced.

A limited amount of the Fund's assets may be held in exchange-traded funds, other transferable securities (including government and public securities), cash and deposits.

Investments that derive their value from another closely related underlying investment (known as derivatives) are also permitted. These will be used for efficient portfolio management purposes (EPM) only.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Concepts to understand

Capital Growth Capital growth is defined as the rise in an investment's value over time.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The fund is shown in risk category 6 because its share price has shown a high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge	None
--------------	------

Exit charge	None
-------------	------

Charges taken from the fund over a year:

Ongoing charge	0.15%
----------------	-------

Charges taken from the fund under specific conditions:

Performance fee	None
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 4 September 2008 as a unit trust and converted to an open-ended investment company (OEIC) on 26 February 2010. The share class launched on 4 September 2008.
