

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Neuberger Berman US Small Cap Intrinsic Value Fund ("Fund")

a sub-fund of Neuberger Berman Investment Funds plc

GBP I Accumulating Class - Unhedged, IE00BLR75F08

This Fund is managed by Neuberger Berman Asset Management Ireland Limited.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to increase the value of your shares through investment in equity securities issued by smaller US companies which the Sub-Investment Managers view as being undervalued by the market.

These companies are typically valued at less than USD5 billion at the time of initial purchase or companies which are typically within the universe of the benchmark. These companies will be publicly traded US and foreign companies that conduct most of their business in the US or are headquartered in the US.

The Fund aims to identify companies that the Sub-Investment Managers believe are selling at a material discount to their intrinsic value (i.e. its inherent worth, as distinct from its current market price) where a particular catalyst could cause the value of the company to increase. Such catalysts may include:

- Personnel or financial restructuring.
- Management changes.
- Changes in organisational/business structure.
- Share repurchases asset sales.
- Changes to the company's business objectives, strategies, processes and workflows.
- Any future business prospect which the Sub-Investment Managers believe may result in long-term growth of the company.

The Fund may also invest up to 20% of its Net Asset Value ("NAV") in equity securities issued by US and non-US (including emerging (less developed) market countries) mid-capitalisation companies and mid-capitalisation companies are considered to be those with market capitalisations of between USD5 billion and USD20 billion at the time of initial purchase.

The Fund is actively managed and does not intend to track the benchmark, the Russell 2000 Value Index (Total Return, Net of Tax, USD) which is used for performance comparison purposes and used as a universe from which to select securities. The Fund may not hold all or many of the benchmark's components.

The Fund does not apply the ESG Policy and deems Sustainability Risks not to be relevant to the Fund strategy.

This Fund may not be appropriate for short-term investment and is more suitable as part of a diversified portfolio.

You may sell your shares on any day when the financial markets in London and New York are open for business.

As your shares are in British Pounds and the Fund is in US Dollars, fluctuating currency exchange rates may affect the value of your investment.

Your shares do not pay you income, but returns are reinvested to grow capital.

Transaction costs will reduce the Fund's return.

RISK AND REWARD PROFILE

This Fund is in category 6 due to its level of historical volatility. As the share class has less than 5 years of returns history, the historical volatility includes benchmark/representative portfolio returns. The Fund invests in a variety of investments, some of which can vary significantly in price from day to day due to a number of factors.

The main risks facing the Fund are:

- Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including the overall performance of companies and the market perception of the global economy.
- Liquidity Risk: The risk that the Fund may be unable to sell an investment readily at its fair market value. This may affect the value of the Fund and in extreme market conditions its ability to meet redemption requests upon demand. To counter this risk the Fund actively monitors the liquidity of its investments. Smaller companies' shares can be harder to sell and their prices more volatile.
- Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date. The insolvency of any institution providing services such as the safekeeping of assets or acting as counterparty in respect of derivatives or other instruments may expose the Fund to financial loss.
- Derivative Risk: The Fund is permitted to use certain types of derivative instruments to seek to protect its assets against some of the risks outlined in this section. Their use will create leverage, an investment technique which gives an investor a larger exposure to an asset than the amount it invested. The Fund's use of leverage may result in greater variations (both positive and negative) in the value of your shares. However, leverage is limited to 100% of the Fund's assets and the Sub-Investment Managers will ensure that the Fund's use of derivatives does not materially alter the overall risk profile of the Fund. Please refer to the Prospectus for a full list of the types of derivative that the Fund may utilise.
- Operational Risk: The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.
- Currency Risk: Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. If the currency of this share class is different from your local

currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.

For a more detailed explanation of risks, please refer to the "Investment Restrictions" and "Investment Risks" section of the Prospectus.

A category 1 fund is not a risk free investment - the risk of losing money is smaller than that of a category 7 fund, but the likelihood of making gains is also lower. The seven category scale is complex: for example, a category 2 fund is not twice as risky as a category 1 fund.

The category is calculated using past data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time.

CHARGES

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing Charges	1.00%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it.

These charges reduce the potential growth of your investment.

The one-off charges shown are the maximum figures. In some cases they may be less. You can find out your actual charges from your financial adviser.

The ongoing charges figure is based on the expenses for the period ending 31 December 2023. This figure may vary from year to year.

You can find more details on these charges in the "Fees and Expenses" section of the prospectus and supplement.

PAST PERFORMANCE

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs.

The value of this class is calculated in British Pounds.

The Fund launched on 30 April 2015.

This class started to issue shares on 9 March 2021.

From 28 February 2020 performance is compared against Russell 2000 Value Index (Total Return, Net of Tax, USD) converted into the relevant currency of the share class.

Prior to this date, performance is compared against Russell 2000 Value Index (USD Total Return).
