The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide income in excess of the income generated by the FTSE Asia Pacific ex-Japan TR Net Index, the "Benchmark Index", measured before the deduction of any charges and over rolling five-year periods, whilst aiming for capital growth over the long term (at least five years). There is no guarantee that the objective will be met over any period and capital invested in the Fund is at risk.
 - The Fund is actively managed and will invest at least 80% in the shares of companies listed or domiciled in the Asia Pacific region (excluding Japan but including Australia and New Zealand) and in shares quoted on other stock exchanges where the company's principal business activities are in the Asia Pacific region (excluding Japan but including Australia and New Zealand).
 - Over a market cycle (typically 5 years), the Fund will comprise on average 40 to 80 companies selected by the Manager following research of each company.
 - The Fund may also invest in participatory notes, preference shares, cash, deposits, money market instruments (such as treasury bills) and collective investment schemes, including those which are operated by the Manager or an associate of the Manager.
 - In addition, the Fund is also permitted to receive and hold warrants and convertible bonds as a result of corporate actions.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objectives.
 - Your units will be income units. Income from the Fund's investments will be paid out to you every three months (as dividends). This will reduce your capital growth accordingly.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund is designed for investors looking for a combination of income and growth from an investment in company shares from the Asian Pacific region (excluding Japan but including Australia and New Zealand).
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest. Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

- The ongoing charges are taken from the Capital of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.16% for purchases and 0.29% for sales at 31 December 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.
