

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CT Multi-Sector Higher Income Bond Fund

Share Class: C Inc, a Fund of Columbia Threadneedle (UK) ICVC I (ISIN GB00B8191314). This Fund is managed by Columbia Threadneedle Fund Management Limited.

Objectives and investment policy

The Fund aims to achieve an income return, with some capital growth over the medium to long term (at least 3 to 5 years). The Fund invests at least 70% in a diversified multi-sector portfolio of high yield fixed income securities (securities that pay either a fixed or variable level of income on a periodic basis and generally repay a specified amount at a predetermined date). The Fund has a focus on high yield bonds from multiple sectors including developed markets, emerging markets and asset-backed issues. The bonds may be issued by companies or other entities including supranationals, sovereigns and governments. The issuers may be from anywhere in the world and issues may be denominated in any currency. Non-sterling exposure will normally be hedged back to sterling. Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in bonds or in currencies other than the Fund's accounting currency, which is sterling. The investment manager selects the high yield bonds in which the Fund invests with the intention of achieving a wide degree of diversification across issuers and industries, and potentially across multiple investment sectors, while managing exposure to credit risk. High yield bonds are considered by the investment manager to be either those rated by independent ratings agencies such as S&P as BB+ or lower (or their equivalent) or those which are not rated by an independent ratings agency but which the investment manager believes to be of comparable quality. To the extent that the Fund is not fully invested in high yield bonds, the Fund may also invest in other transferable securities (including investment grade bonds, which are rated by independent ratings agencies such as S&P as BBB- or higher (or their equivalent)), collective investment schemes (which may include schemes managed by the Columbia Threadneedle investments), deposits, cash, near cash, money market instruments and warrants. The Fund may use derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying assets) only for the purposes of hedging and efficient portfolio management. The Fund is actively managed. The Manager believes that an appropriate comparator benchmark for reviewing fund performance is the IA £ High Yield Median, given the investment policy of the Fund and the approach taken by the manager. The Fund is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition. Income is distributed quarterly. There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years. You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point. We are not required to hold monies arising from the purchase and sales of shares in our funds in a client money bank account and hold these monies in our own bank account, utilising the FCA's permitted one-day window while carrying out a delivery versus payment transaction for the purpose of settling transactions in relation to units in the Fund. In the exceptional event that a transaction is not processed within this one-day window, any cash will be held in a client bank account. No interest will be paid on cash held on a client bank account.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Loses can be greater than the initial investment.

Fixed Interest Securities Risk: changes in interest rates can affect the values of fixed interest holdings.

Credit Risk: receiving income or capital due from debt instruments is dependant on the provider's ability to pay.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.56%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

The ongoing charges figure is estimated due to a change to the way in which costs and charges are accrued within the Fund.

It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section entitled Fees and Expenses in the Fund's prospectus, which is available at www.columbiathreadneedle.co.uk.

Past performance

Source: FE fundinfo 2024

You should be aware that past performance is not a guide to future performance.

Fund launch date: 20/11/2000.

Share/unit class launch date: 06/09/2012.

Performance is calculated in GBP.

The chart shows how much the Fund increased or decreased in value as a percentage in each year, net of charges (excluding entry charge), and net of tax.

* IA Sterling High Yield
