

FTF Martin Currie UK Mid Cap Fund

Class W (inc) • ISIN GB00B8K8HH50 • A sub-fund of Franklin Templeton Funds

The management company is Franklin Templeton Fund Management Limited which is referred to in this document as the authorised corporate director or "ACD".

Objectives and Investment Policy

The Fund aims to grow in value by more than the FTSE 250 (ex-Investment Trusts) Index, from a combination of income and investment growth over a three to five-year period after all fees and costs are deducted.

There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

Core investment

The Fund invests at least two thirds (but typically significantly more) in the shares of medium-sized companies that are constituents of the FTSE 250 (ex-Investment Trusts) Index and that are incorporated/domiciled in the UK or which have significant business operations in the UK. This will typically be around 30–50 companies.

Other investments

The Fund may also invest in:

- Debt securities or bonds (debt obligations that pay interest) issued by governments, government-related, supranational organisations or corporations;
- Convertible securities (a type of corporate debt security which can be exchanged for shares in the same organisation);
- Other types of transferable securities;
- Cash and cash equivalents;
- Money market instruments; and
- Other collective investment schemes (which may include collective investment schemes operated by the ACD or any of its associates). The Fund may not invest more than 10% in other collective investment schemes.

The Fund can use derivatives for efficient portfolio management (managing the fund in a way that is designed to reduce risk or cost and/or generate extra income or growth). However, the Fund can introduce more speculative use of derivatives in the future on 60 days' notice to investors. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, interest rates, share prices or currencies).

Geographic locations (where we invest)

The Fund focuses on investment in the UK although the Fund's managers have discretion to invest in any other country to a lesser extent.

How we select investments (investment strategy)

This Fund is actively managed, which means that the Investment Manager does not copy a benchmark when selecting investments for the Fund.

The Investment Manager tries to further reduce risk by making sure no single company share dominates the Fund's investments. Normally, the Investment Manager tries to keep shareholdings in any individual company between 1.5% and 5% of the Fund's total value.

The Investment Manager does not intend to invest in every company in the FTSE 250 (ex-Investment Trusts) Index and, while the Investment Manager has the freedom to invest up to 10% of the Fund's assets outside of it, this is rare and typically has been because of changes to an index composition. Any proportion of the Fund can be invested into specific industry sectors, but the Investment Manager seeks to avoid any unintentional emphasis on a sector in a way that could increase the level of risk.

ESG (environmental, social, and governance) factors

In selecting the Fund's investments, the Investment Manager assesses prospective investments against various ESG factors. These ESG factors are used to inform the Investment Manager's wider assessment of the value and financial attractiveness of each potential investment and exposures are adjusted accordingly. The Investment Manager may exclude investments depending on their assessment of ESG factors. In addition, the Investment Manager applies automatic exclusions for investments in certain sectors or which fail certain international standards. For more detailed information about how the Investment Manager considers ESG, and a list of exclusions, please see the investment objective and policy in the prospectus for the Fund, available at www.franklintempleton.co.uk in the "Resources and Literature – "Fund Documents" tab.

Terms to Understand

Shares of companies (equities): securities that represent an ownership stake in a company.

Transferable securities: investments such as shares or debt that can be bought and sold between investors.

Collective investment schemes: other investment funds, like the Fund.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in equity securities of mid-sized UK companies that are included in the FTSE 250 (ex-Investment Trusts) Index. Such securities have historically been subject to price movements, sometimes to a greater extent than securities of large UK companies, due to company-specific

factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Concentration risk: the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities.

Equity risk: prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance.

Investment in smaller company shares: the fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested (in the case of the entry charge) or before money is paid out to you when you sell shares in the Fund (in the case of the exit charge).

Charges taken from the Fund over a year

Ongoing charges	0.82%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

The ongoing charges figure is based on the expenses for the Fund for the year to December 2023 and it may vary from year to year. It is an estimate of the charges made to the Fund over a year to cover the costs of managing, operating, and distributing the Fund. Charges are deducted from the value of the assets held by the Fund and are reflected in the daily price that is used to buy and sell shares in the Fund. These charges reduce the potential growth of your investment and/or the income paid from it. For example, a Fund with an ongoing charges figure of 0.5%, means that an investor would pay £5 in charges over the course of a year for every £1,000 they had invested. Please note that the ongoing charge excludes some other costs (such as those incurred by the Fund when buying and selling securities) so total costs paid by investors each year may be slightly higher than the ongoing charges figure.

For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds and the Fund's annual report for details on the exact charges made.

Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP.
- The Fund was launched in 2011 and the present share class on 21/09/2012.
- The FTSE 250 (ex-Investment Trusts) Index is the Fund's performance target and constrains the Fund's investment universe. It is widely available and reflects the performance of medium-sized companies.
