

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ES River and Mercantile UK Dynamic Equity Fund

B Accumulation (GBP), ISIN: GB00B7H1R583
A sub-fund of the ES River and Mercantile Funds ICVC
Equity Trustees Fund Services Ltd is the Authorised Corporate Director of the Fund

Objectives and investment policy

The investment objective of the Fund is to grow the value of your investment (known as “capital growth”) in excess of the MSCI United Kingdom Investable Market Index (IMI) Net Total Return (the “Benchmark”) over a rolling 5 year period, after the deduction of all fees.

Although the sub-fund aims to deliver capital growth over a rolling 5 year period, there is no guarantee that this will be achieved over this time period, or any time period. The Fund’s capital is at risk meaning that the Sub-Fund could suffer a decrease in value and the value of your investment would decrease as a result.

The Fund seeks to achieve its investment objective by investing at least 60% of its value in shares of UK companies (companies which are domiciled, incorporated, or have significant operations in the UK). Investment can be direct, or indirect, in shares (including common and preference shares), rights for shares, warrants, depositary receipts (securities issued by banks that represent company shares), investment trusts (including REITS) and collective investment schemes.

In addition, up to 20% of the Fund may be invested in shares of companies which are not UK companies but which, at the time of investment, are listed in the UK. Investment can be direct or indirect as noted above. It is expected that at least 80% of the Fund will be invested in UK companies and companies which are listed in the UK.

Up to 20% of the Fund may be invested in shares of overseas companies (companies which are not UK companies and which are not listed in the UK), excluding emerging markets, collective investment schemes and cash. Investment can be direct or indirect as noted above.

Investment in collective investment schemes (which includes exchange traded funds) can include those operated and/or managed by the ACD or the Investment Manager.

The Fund may use derivatives for the purposes of reducing risk or cost or for generating extra income or growth (known as “efficient portfolio management”). As an example, the Fund may use forward contracts for currency hedging with the intention of reducing the risk arising from currency exposures in a cost-effective way.

The Fund is actively managed, meaning the Investment Manager will use their expertise to pick investments to achieve the Fund’s objectives.

The Fund will invest in a range of companies by industry sector and size. Although its investments are not restricted by reference to a benchmark the Fund will invest in a limited number of companies which means that at times the Fund may be concentrated, meaning that it will typically be invested in between 40 and 60 companies. This absence of any benchmark constraints gives the Investment Manager wider scope to be dynamic in its investment decisions (for example by allowing the Investment Manager to change investments when they believe necessary in line with market circumstances to achieve the Fund’s objective) than if they were required to invest within such controls.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

This Fund is ranked at 6 because funds of this type have experienced medium to high rises and falls in value in the past. The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile. The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free. While the risk indicator takes into account the broader risk profile, the following risks are considered most relevant to this Fund:

- **Equity Securities:** Equities can lose value rapidly, and typically involve higher market risks than bonds, money market instruments or other debt instruments. Fluctuation in value may occur in response to activities of individual companies, the general market, economic conditions, or changes in currency exchange rates.
- **Small and Mid-Cap Stock:** Stocks of small and mid-size companies can be more volatile and less liquid than stocks of larger companies. Small and mid-size companies often have fewer financial resources, shorter operating histories, and less diverse business lines, and as a result can be at greater risk of long-term or permanent business setbacks.
- **Concentration:** In certain conditions the Sub-Fund may invest in a relatively small number of securities , which may result in portfolio concentration in sectors, countries, or other groupings. These potential concentrations mean that a loss arising in a single investment may cause a proportionately greater loss in the Sub-Fund than if a larger number of investments were made.
- **Liquidity:** There is a risk that adverse market conditions may affect the Fund’s ability to sell assets at the price the Fund would like, or the Fund may have to sell them at a loss.
- **Currency:** To the extent that a Sub-Fund holds assets that are denominated in currencies other than the base currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.25%*
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

*The current entry charge is 0% and if we wish to increase this charge then 60 days' notice will be provided.

Charges taken from the fund over a year

Ongoing charge	0.90%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- For the ongoing charge, the figure is at 30/09/2023.
- All charges and fees, except any investor dealing charges, have been included within the performance.
- For more information about charges please refer to the Fund's Prospectus which is available from the ACD at www.equitytrustees.com.

Past Performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 22/03/2007.
- Share/unit class launch date: 21/11/2012.
- Performance is calculated in GBP.
- The graph shows full calendar year performance in GBP. Performance shown takes into account ongoing charges, but not entry fees, and is calculated in pounds sterling on a Net Asset Value basis with net dividends reinvested.
- MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This document is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.
