Regnan Global Equity Impact Solutions

F Accumulating GB00BMCZDJ66

A sub-fund of Regnan UK Umbrella Fund

Managed by JOHCM Funds (UK) Limited

Objectives and investment policy

- The Fund aims to achieve capital growth in excess of the MSCI ACWI IMI Index (net of fees) over rolling 5 year periods and to generate a positive impact by investing in companies that have the potential to address the world's major social and environmental challenges.
- The Fund will invest at least 80% of the portfolio in shares of companies quoted and/or traded on Regulated Markets worldwide and which aim to generate positive, measurable social and environmental impact when measured against the taxonomy developed by the Investment Manager relating to sustainable development goals (the "Regnan Taxonomy"), alongside a financial return. It is anticipated the Fund will have less than fifty holdings.
- Up to 20% of the Fund may be invested in shares of other companies (including investment trusts and REITs), exchange traded commodities, investment grade and government bonds, convertible bonds and cash. Up to 10% of the Fund may be invested in collective investment schemes. Derivatives may be used for efficient portfolio management purposes (including hedging).
- The Regnan Taxonomy draws on the targets that underlie the United Nations Sustainable Development Goals (the "UN SDGs"). It will initially be closely aligned with the UN SDGs but may also include sustainable development goals and targets published by other entities.
- The Investment Manager will use the Regnan Taxonomy to: (i) understand and identify the underlying environmental and social problems which need to be addressed; (ii) identify the products and services which contribute to finding solutions to these problems; and (iii) identify suitable investee companies which are selling these products and services.
- The Investment Manager will engage with all investee companies during the holding period to keep track of engagement objectives and the progress that is being made towards these objectives.
- The Investment Manager will measure and report the social and environmental performance of underlying investments.
- The Fund is actively managed with the fund managers using their expertise to pick investments to achieve the Fund's objective.
- The Fund's performance may be measured against the MSCI ACWI IMI

Index (12pm adjusted, the "Index"). The Index is used as a target benchmark for the Fund. Use of the Index does not limit the investment decisions of the fund managers so the Fund's shareholdings may differ significantly from the Index. The Index is used as it captures large, mid and small cap representation across 23 Developed Markets and 24 Emerging Markets countries. With 9,070 constituents, the Index covers approximately 99% of the global equity investment opportunity set.

- Any income the Fund generates for this share class is accumulated.
- You can buy and sell shares in the Fund on any day which is a working day in London. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within five years.
- The mid-day index is a customised variant designed and maintained by MSCI, for alignment with this Fund's UK mid-day valuation point.

Risk and reward profile

⚡ Typically lower rewards ⚡ Lower risk			Typically higher rewards ⚡ Higher risk ⚡			
1	2	3	4	5	6	7

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on simulated historical performance data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- As this share class has not been in existence for 5 years, simulated performance data has been used.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- The Fund may invest in shares priced in currencies other than the currency of the share class. This may result in the value of the share class increasing or decreasing due to changes in foreign exchange rates.
- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the Fund value may be affected by:

- Changes in exchange rates between currencies may cause the value of the investments to diminish or increase.
- Any change in the Company's tax status or in legislation could affect the value of investments held by the Company.
- Political and/or regulatory risks.
- Equity risk: Equities invested in by the Fund may involve substantial risks and may be subject to wide and sudden fluctuations in market value, with a resulting fluctuation in the amount of profits and losses.
- Emerging Markets and Frontier Markets risk: Investing in companies in Emerging Markets and Frontier Markets involves higher risk than investing in established economies or securities markets. Emerging Markets and Frontier Markets may have less stable legal and political systems which could affect the safe-keeping or value of assets. Investments in emerging markets and frontier markets funds should not constitute a substantial portion of an investor's portfolio.
- As the portfolio is concentrated, it may be more volatile than a diversified one.

Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.
