Rathbones
Look forward

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Rathbone Greenbank Strategic Growth Portfolio (S-Class Accumulation)

A sub-fund of Rathbone Greenbank Multi Asset Portfolio (OEIC)
Authorised Corporate Director: Rathbone Unit Trust Management Limited
S-Class Accumulation ISIN GB00BMQC4P68

Objectives and Investment Policy

We aim to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation + 3%, after fees. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest and dividend payments). We use the CPI + 3% as a target for our fund's return because we aim to grow your investment above inflation.
We aim to deliver this return with no more than two-thirds of the volatility of the FTSE Developed stock market Index. As an indication, if global stock markets fall our fund value should be expected to fall by around two-thirds of that amount. Because we measure volatility over a five-year period, some falls may be larger or smaller over shorter periods of time. We aim to limit the amount of volatility risk our fundcan take because we want our investors to understand the risk they are taking in terms of the global stock market.
We split our fund's investments between three categories, which we call our LED framework: Liquidity, Equity-type risk and Diversifiers. We can invest between 5% and 40% in Liquidity assets. These can besold easily and dampen volatility, but they also lower your potential return. We can invest between 40% and 80% in Equity-type assets. These include shares and anything that behaves like shares, which arethe best tools to beat inflation and grow your capital, but they are also more volatile. We can invest between 0% and 40% in Diversifiers. These assets behave very differently to stocks and bonds, which reduces volatility and adds a layer of protection to your investment. These limits are reviewed annually or in response to changes in the market.
Our fund invests globally in the following:
- Government and corporate bonds, with no restriction on their credit quality
- Listed company shares
- Actively managed funds
- Passively managed funds
- Structured products
- Derivatives for hedging

Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. We can choose to hedge our overseas assets back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.
We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years. Our fund's responsible investment policy is applied by Rathbone Greenbank Investments, a responsible investment and research division of our company.
Greenbank have the ability to veto investments which do not meet the responsible investment policy, which ensures it is applied without bias or influence from our fund managers. Full details of ourresponsible investment policy can be found on our website.

Our fund is designed for investors with a basic knowledge of multiasset investments who seek growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.
You can buy and sell units on each business day of the fund between 9am and 5pm.
The fund offers accumulation shares (shares in which any dividends received are added to the share price) and income shares (shares in which any dividends received are paid to the shareholder).

Risk and reward profile

Typically lower rewards
Lower risk

Typically higher rewards
Higher risk

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk. However, the lowest category (1) does not mean a risk free investment.
The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time.
This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.
The risk indicator for this fund reflects the following:
- As an asset class, shares have greater risk than either bonds or money market instruments.
- As this fund is less than five years old, the indicator is not based solely on actual performance.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.
During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:
Sustainability Risk: Returns could deviate from the market or funds that don't promote environmental or social characteristics, or that don't avoid investments/sectors e.g., oil, tobacco.
Liquidity risk: Some assets become hard to sell at their expected price. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.
Counterparty risk: A company that we deal with may renege on its obligations, costing you money.
Credit Risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.
Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.
Derivatives risk: Sometimes we use financial contracts to reduce risk. There is a chance that these derivatives won't work in the way we intended, which could result in unexpected gains or losses.
Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Charges for this Fund

The fund manager receives an annual fee,which is included in the ongoing charges shown below. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses as at the Fund's current year-end or semi-annual period.
