Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

GAM Star Global Rates

hereafter the "Fund", a sub-fund of GAM Star Fund p.l.c.
Inst Inc - GBP (the "Share Class") **ISIN: IE00B59CJN74**
Manager: GAM Fund Management Limited part of GAM Group AG.

Objectives and investment policy

- The investment objective of the Fund is to achieve absolute returns.
- The Fund seeks to achieve this objective through a process of economic analysis in both global currency and fixed income markets. There are both medium and short term based themes involved in the Fund's strategy.
- Investment may be made in government or corporate fixed and floating rate Fixed Income Securities, with a focus on securities issued in developed markets.
- The Fund may opportunistically participate in Emerging Markets.
- The Fund may invest in currencies or currency-related derivative instruments, principally options on foreign currencies and forward foreign exchange contracts.
- The Fund promotes environmental and/or social characteristics in accordance with Article 8 of Regulation (EU) 2019/2088 ("SFDR") but does not have sustainable investment as its objective.
- The Fund is considered to be actively managed in reference to Sterling Overnight Index Average (SONIA) (the "Benchmark") by virtue of the fact that it uses the Benchmark in the appropriate currency for performance comparison purposes and the performance fees payable to the Fund Manager may be calculated based on the performance of the Fund against the Benchmark. However the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.
- Shares in the Fund can be bought and sold daily (every Business Day of the Fund).
- The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.
- Any income arising from this Share Class will be distributed. Other share classes of the Fund may accumulate income.
- The fund manager has discretion in managing the investments of the Fund.
- The Fund may use a number of complex derivative instruments for investment purposes and/or efficient portfolio management purposes. Further information on the Fund's use of derivatives can be found under the Derivatives section within the Fund's Supplement. The use of these instruments may result in the Fund being leveraged whereby the total exposure of the Fund as a result of all positions held by it may significantly exceed its Net Asset Value.
- The share class is denominated in GBP. This is hedged against the Fund's base currency.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

Lower risk — **Higher risk**

Lower reward potential — **Higher reward potential**

1	2	3	4	**5**	6	7

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- The Fund is assigned to the above category based on its historical fluctuations in value.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently from in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Leverage Risk:** derivatives may multiply the exposure to underlying assets and expose the Fund to the risk of substantial losses.
- **Counterparty / Derivatives Risk:** if a counterparty to a financial derivative contract were to default, the value of the contract, the cost to replace it and any cash or securities held by the counterparty to facilitate it, may be lost.
- **Currency Risk - Non Base Currency Share Class:** non-base currency share classes may or may not be hedged to the base currency of the Fund. Changes in exchange rates will have an impact on the value of shares in the Fund which are not denominated in the base currency. Where hedging strategies are employed, they may not be fully effective.
- **Capital at Risk:** all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed.
- **Interest Rate Risk:** a rise or fall in interest rates causes fluctuations in the value of fixed income securities, which may result in a decline or an increase in the value of such investments.
- **Market Risk / Emerging Markets::** emerging markets will generally be subject to greater political, market, counterparty and operational risks.

The "Risk Factor" section of the Prospectus and the "Risk Factor" section of the Fund Supplement for this Fund give you more details about all the risks for the Fund – see under "Practical Information" for how to obtain a copy.

Charges

The charges you pay are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	0.00%
Switching charge	1.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.19%
Charges taken from the fund under certain specific conditions	
Performance fee	Calculation Methodology: 10.00% of the outperformance of the High Water Mark or of the prorated Sterling Overnight Index Average (SONIA) rate of return, whichever is the lower. Calculation period is based on the same period as the ongoing charge. Performance fee charged in the last Calculation Period: 0.40%.

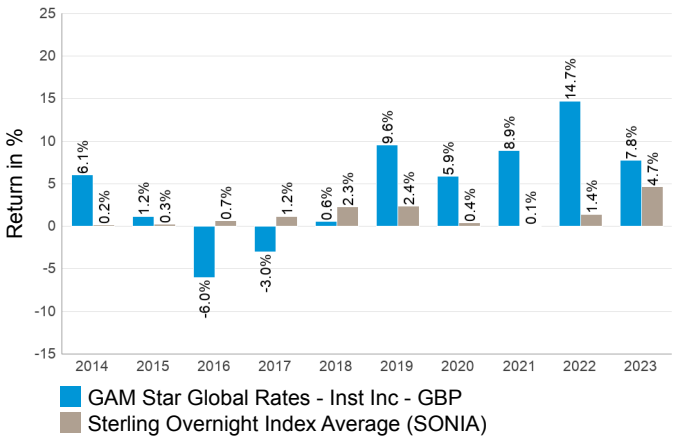

The **entry, exit and switching charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on expenses at the end of the financial year and includes the ongoing charges of the underlying funds. This figure may vary from year to year. It excludes bank interest, portfolio transaction costs and any performance fees if applicable.

You may be charged a **dilution levy** of up to 1% of the value of the Shares (representing the cost of buying or selling investments) on entry to or exit from the Fund.

For more information about charges, please see the "Fees and Expenses" section of the Prospectus and the "Fees" section of the Fund Supplement, which are available at www.gam.com

Past performance

- Please note that past performance is not necessarily a guide to the future performance of the Fund.
- The data is net of tax and charges and is exclusive of subscription and redemption fees, as any subscription and redemption fees are not received by the Fund.
- Activation year of the share class: 2009
- Past performance has been calculated in GBP and relates to the Share Class.
- With effect from 1 December, 2021 the Fund changed its benchmark to the Sterling Overnight Index Average (SONIA). Prior to this date, past performance is shown against 3 Month LIBOR.
