## WS Sequel Growth Target Return Strategy Fund

Retail Class (GB00BBDRR691)

a Sub-Fund of WS Sequel Investment Funds ICVC II

Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund

### OBJECTIVES AND INVESTMENT POLICY

#### Investment Objective

The investment objective of the Fund is to provide capital growth (net of fees) over any 5-year rolling cycle of 5% per annum over the return that could be expected from long term cash deposits, represented by the Bank of England 1 Year Fixed Rate Bond IUMWTFA.

Capital in the Fund is at risk and there is no guarantee that the investment objective will be achieved over this or any other time period.

#### Investment Policy

The Fund will seek to achieve its investment objective predominantly by gaining exposure to UK and overseas equities, fixed interest securities, money market instruments, cash and near cash. The Fund's allocation between these asset classes will be dependent on the Investment Manager's view on market conditions. However, over the longer term, there will be a higher weighting in equities over any other asset class.

The Fund may be expected to have a relatively high degree of volatility.

To achieve this exposure, it is anticipated that the Fund may be almost wholly invested through collective investment schemes. As the Fund grows in size, it is intended that the Fund will invest less in collective investment schemes and instead invest to a greater extent or wholly directly (where permitted) into the asset classes set out above.

The Fund may also invest directly or indirectly at the Investment Managers discretion, in other transferable securities and collective investment schemes which may have exposure to alternatives such as commodities, loans, hedge funds, private equity and property.

The Fund may use derivatives for the purpose of Efficient Portfolio Management.

#### Benchmark

The Target Benchmark of the Fund is Bank Of England 1 Year Fixed Rate Bond IUMWTFA + 5%.

The Target Benchmark is considered an appropriate benchmark for the Fund to seek to outperform and against which its performance may be assessed, as it enables a comparison of the investment manager's actively managed sector allocation decisions relative to a sector equal-weight "neutral" benchmark.

The Target Benchmark is reviewed and rebalanced quarterly

#### Income

Any income the Fund generates in respect of your investment is rolled up (accumulated) and included in the value of your shares.

#### Fund Currency

The base currency of the Fund is GBP.

#### Subscription and Redemption

You can buy or sell shares in the Fund at 12 noon on any day that is a business day in the UK if you tell us before 12 noon that you want to do so.

### RISK AND REWARD PROFILE

#### Risk Disclaimer

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.

The lowest risk category does not mean that your investment will be risk free.

The value of investments is subject to market fluctuations. Your original investment is not guaranteed and you may not get back the full amount invested in the Fund.

#### Why is the fund in the specific category?

This Fund is ranked 5. This is due to historical price movement of such investments.

#### The indicator does not take into account the following risks of investing in this Fund:

- The value of investments in equities and bonds may be affected adversely by political, economic or company news as well as changes in company earnings and interest rates.
- The Fund invests in fixed interest securities, there is a risk that issuers of the Bonds may not be able to repay the money they have borrowed or the interest that is due.
- Where the Fund makes investments in assets that are not denominated in GBP, changes in exchange rates will affect the value of your investment. The Fund may use derivatives to reduce risk of exchange rate movement and protect the value of the fund, although this may not be achieved.
- There is a risk of a loss to the Fund due to system failures, inadequate controls and human error.

Further details on risk factors that apply to this Fund are set out in the Risk Factors section of the prospectus.
