

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# IFSL Marlborough Special Situations Fund Class P Units

(ISIN Accumulation GB00B907GH23)

This Fund is managed by Investment Fund Services Limited (IFSL)

## Objectives and Investment Policy

The aim of the Fund is to provide capital growth, that is, to increase the value of your investment, however, there is no certainty this will be achieved.

At least 80% of the Fund will be invested in the shares of companies listed in the UK, incorporated or domiciled in the UK or with significant business operations in the UK. This will include a range of small, medium and large companies. In any event, at least 60% of the Fund shall be invested in smaller companies, defined as companies with a market capitalisation of less than £2.5bn at the time of purchase.

The aim of the investment team is to identify companies which they believe show good long-term growth potential, or which appear to be under-valued given their future prospects.

The team consider economic and market conditions, but the main focus is on individual company analysis and selection.

Following the same investment philosophy, the Fund may also invest in companies which are listed on overseas stock exchanges, other securities which offer returns linked to the company performance, such as, preference shares, convertible bonds and warrants.

The Fund may, from time to time, hold shares in companies that become unquoted following investment, due to a delisting or other corporate event, for example. The Fund will not make new investment into the shares of companies that are unquoted.

The Fund is actively managed, which means the investment manager decides which investments to buy or sell and when. The Fund invests in a diverse portfolio

of investments and is not constrained by any industry or sector.

The Fund may hold cash to enable ready settlement of liabilities (including the redemption of units), for the efficient management of the Fund and in order to meet its objective.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA UK All Companies sector. You may want to assess the Fund's performance compared to the performance of this sector.

Investors should note that whilst the IA UK All Companies sector is representative of the general nature of the Fund, the sector also contains other funds investing across the market capitalisation spectrum from large companies to small companies. Due to the Fund investing at least 60% in smaller companies, the Fund is likely to have a greater weighting to smaller companies than the average fund in the sector. When shares of larger companies are performing better than shares of smaller companies the Fund is more likely to underperform the sector. Conversely, the Fund is more likely to outperform when shares of smaller companies perform better than shares of larger companies.

The IFSL Marlborough Special Situations Fund does not pay income. Instead, any income received by the Fund is reinvested back into the Fund.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

## Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this unit class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund will be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund will invest mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 20/12/2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 15 of the Fund's Prospectus, which is available at [www.ifslfunds.com](http://www.ifslfunds.com).

### One-off charges taken before or after you invest

<b>Entry Charge</b>	0.00%
<b>Exit Charge</b>	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over each year

<b>Ongoing Charges</b>	0.80%
------------------------	-------

### Charges taken from the fund under certain conditions

<b>Performance Fee</b>	None
------------------------	------

## Past Performance

### Historic performance to 31 December 2023

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this unit class is calculated in GBP.

The Fund was launched on 12 July 1995.

This Unit Class was launched on 31 December 2012.

Benchmark: Prior to 02/08/2021 the comparator benchmark of the Fund was the 100% IA UK Smaller Companies sector. As of 02/08/2021 the comparator benchmark of the Fund is the IA UK All Companies sector.
