A Sub-fund of the IFSL Marlborough No2 OEIC (ISIN Income GB00B908BY75, Accumulation GB00B907VX32)
This Fund is managed by Investment Fund Services Limited (IFSL)

The aim of the Fund is to provide income, that is, money paid out from an investment as dividends from shares, as well as to deliver capital growth, that is to increase the value of your investment, over a minimum of 5 years. The Fund aims to deliver a greater income than the FTSE All-Share Index, over any 3 year period, after any charges have been taken out of the Fund, however, there is no certainty this will be achieved.

The Fund will invest at least 80% in the shares of companies and investment trusts listed on UK stock exchanges. This will include a range of small, medium and large companies, with a bias towards small and medium companies.

The Fund is actively managed, which means the manager decides which investments to buy and sell and when. Investments are selected based on individual company research.

The Fund invests in companies which the manager believes: • have the ability to increase their dividends and offer the potential for growth; or • companies which have previously paid steady dividends and are expected to continue to do so.

The Fund may also invest in companies which are listed on overseas stock exchanges, other securities which offer returns linked to the company performance, such as warrants, preference shares and convertible bonds, unquoted companies and other funds.

The Fund will normally be fully invested save for an amount to enable ready

settlement of liabilities (including redemption of shares) and efficient management of the Fund both generally and in relation to strategic objectives however may hold higher cash balances in extreme market conditions.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA UK Equity Income sector. You may want to assess the Fund's performance compared to the performance of this sector.

The performance benchmark is the level of performance the Fund aims to deliver however there is no certainty this will be achieved. FTSE All-Share Index has been chosen as the performance target as the composition of the index is broadly similar to the holdings in the Fund.

The IFSL Marlborough Multi Cap Income Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund will be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies

may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund will invest mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/07/2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 22 - 24 of the Fund's Prospectus, which is available at www.ifslfunds.com.
