The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Jupiter Asset Management Series PLC - Jupiter Emerging Market Debt Income Fund (the 'Fund'), a sub-fund of Jupiter Asset Management Series PLC

U1 GBP Inc (ISIN - IE00BFWH5N11)

The Manager is Jupiter Asset Management (Europe) Limited (the "Manager")

### Objectives and Investment Policy

**Objective:** a total return comprised of income and capital growth by primarily investing in debt investments issued in emerging markets.

**Policy:** in seeking to achieve its investment objective, the fund will aim to deliver a return, net of fees, greater than that of the composite benchmark comprising 65% J. P. Morgan Corporate Emerging Markets Bond Index Broad Diversified and -35% J.P. Morgan Emerging Market Bond Index Global Diversified Index over rolling 3 year periods. The Fund will invest in bonds and similar debt investments issued by governments and other public entities and companies. At least two thirds of the Fund's value will be invested in emerging market countries. The Fund may invest up to 20% in the Chinese Bond Market via the Bond Connect scheme.

The Fund may invest up to 100% in sub-investment grade bonds and similar debt investments (e.g. those with a rating of below BBB- as rated by Standard and Poor's or below Baa3 by Moody's).

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment), with the aim of generating returns and/or reducing the overall costs and risks of the Fund.

The Fund is actively managed. Portfolio construction is driven by an on-going assessment of the drivers of returns such as interest rates, bond prices, economic outlook, inflationary expectations and global political issues. This will also include an assessment of issuers' default risk and value relative to similar bonds in the market.

The composite benchmark is a broad representation of the Fund's investment universe. Although a large proportion of the Fund's investments may be components of the composite benchmark, the Fund has the ability to deviate significantly from the composite benchmark.

Portfolio transaction costs are paid out of the assets of the Fund in addition to the charges set out below, and may have an impact on the performance of the Fund.

**Recommendation:** the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

**Treatment of income:** income from investments, net of expenses, will be paid to shareholders.

**Dealing:** you can buy and sell shares on business days where retail banks are open for business in Dublin and London (excluding Saturdays, Sundays and public holidays).

### Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

- Funds in category 4 have in the past shown moderate volatility. With a fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.
- Investment risk** - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.
- Currency risk** - the Fund is denominated in USD but holds assets denominated in other currencies. This share class is denominated in GBP. The value of your shares may rise and fall as a result of exchange rate movements.
- Emerging markets risk** - less developed countries may face more political, economic or structural challenges than developed countries.
- Credit risk** - the issuer of a bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.
- Bond connect risk** - the rules of the Bond Connect scheme may not always permit the Fund to sell its assets, and may cause the Fund to suffer losses on an investment.
- Interest rate risk** - investments in bonds are affected by interest rates and inflation trends which may affect the value of the Fund.

- Liquidity risk** - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.
- Derivative risk** - the Fund uses derivatives to generate returns and/or to reduce costs and the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.
- Capital erosion risk** - the Fund takes its charges from the capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges.
- For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

## Charges

### One-off charges taken before or after you invest

|              |      |
|--------------|------|
| Entry charge | None |
| Exit charge  | None |

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

|                 |       |
|-----------------|-------|
| Ongoing charges | 1.24% |
|-----------------|-------|

### Charges taken from the Fund under specific conditions

|                 |      |
|-----------------|------|
| Performance fee | None |
|-----------------|------|

- These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.
- The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser or distributor.
- The ongoing charges figure is based on the expenses of the Fund for the 12 month period ended December 2021. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- It is not the intention for a switching charge (2.50%) to apply but the Fund reserves the right to impose a switching charge in the future.
- You can find out more details about the charges by looking at the *Fees and Expenses* section of the prospectus.
