The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Class B Accumulation Shares in GBP (ISIN IE00BFLR2202)

Atlantic House Defined Returns Fund (the 'Fund'), a sub-fund of GemCap Investment Funds (Ireland) PLC (the 'Company')

The Fund is managed by Gemini Capital Management (Ireland) Limited which acts as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to generate capital growth in the value of its shares over the medium to longer term.

The Fund is considered to be actively managed in reference to the Solactive United Kingdom Large Cap EX Investment Trust Index NTR, the Solactive US Large Cap Index and the Solactive Euro 50 Net Total Return Index (the "Benchmarks") by virtue of the fact that the Benchmarks are used for performance comparison purposes. The Solactive United Kingdom Large Cap EX Investment Trust Index NTR is used as the reference index for the purposes of calculating the global exposure of the Fund using the Relative VaR methodology. However the Benchmarks are not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmarks.

The Fund is suitable for investors who are looking for a high probability of capital growth over the medium to long term, but who are able to withstand medium to higher risks, due to the market sensitivity and potentially volatile nature of the underlying investments.

The Fund aims to meet its objectives via exposure to a diversified portfolio of defined return investments linked to global equity indices. It will invest primarily in a mixture of Transferable Securities (i.e. at or above S&P rating BBB- or a rating sourced from another reputable rating agency, which is deemed equivalent by the Investment Manager), Financial Derivative Instruments (FDIs) exposed to global equity indices and cash to gain this exposure. The Fund sells puts, triggered only at their maturity (typically 6 years) At outset, a defined return investment will only be eligible for inclusion if it provides for a long-term positive return in anything but the bleakest of market conditions. However, investors should be aware that

capital is at risk and in the event of very poor equity market performance over a sustained period it is possible that the Fund could generate negative returns. The use of FDIs means that the Fund will employ leverage.

The Fund may take a long exposure, meaning that it will invest directly, or take investment exposure via FDIs, in a security or securities (i.e. equities) with a view that their value will rise.

The Fund may also take a short exposure for hedging purposes, via FDIs, thus benefitting the Fund from a fall in value in a security or securities. Any short exposure within the fund may be up to 100% of the Net Asset Value. However, it is intended that the Fund will be managed to operate in normal market conditions within a range of 100% long exposure and 0% short exposure.

Income and gains in this share class will be accumulated and reinvested on behalf of shareholders.

Investors can buy and sell shares in the Fund on every business day meaning a day on which banks in Ireland and on which the relevant stock exchange is open for normal business subject to the 'Dealing Days for Subscription and Redemptions' and the 'Issue of Shares' and 'Redemption of Shares' section of the Supplement.

Recommendation: This Fund may not be appropriate for short-term investment.

For full details please refer to the 'Investment Objective and Policy', 'Issue of Shares' and 'Redemption of Shares' sections of the Supplement and 'The Shares' section of the Prospectus.

Risk and Reward Profile

lower potential risk/rewards

higher potential risk/rewards

The indicator above illustrates the position of this Fund on a standard risk/ reward category scale. This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested. The Fund is rated 6 due the nature of its investments. The following are risks materially relevant to the Fund which are not adequately captured by the indicator:

Derivatives Risk: The Fund is entitled to use derivative instruments for investment purposes and for efficient portfolio management and/ or to protect against exchange risks. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund. The Fund may enter into various financial contracts (derivatives) with another party. Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/ or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation.

While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

Equity Market Risk: The defined return investments within the Fund, whether via FDIs or Transferable Securities, are all dependent on global equity index performance. In the event of sustained, poor equity market performance the value of the Fund could fall and not recover.

Issuer/Credit Risk: The Fund invests in government and corporate bonds. All bonds will be rated at least A- by Standard and Poors at outset. If any of the bonds the Fund owns suffer credit events the performance of the Fund could be adversely affected.

Liquidity Risk: Lower liquidity means there may be insufficient buyers or sellers to allow the Fund to sell or buy investments readily, which may result in difficulty selling investments at their true value and in a timely manner.

Legal and Regulatory Risk: Future legal or regulatory change could have a significant effect on the Fund.

Other Risks: Other risks the Fund is exposed to include but are not limited to are possible changes in interest rates, changing expectations of future market volatility, changing expectations of equity market correlation and changing dividend expectations.

For a more detailed explanation of the risks, please refer to the "Risk Factors" section of the Prospectus and "Risk Warnings" section of the Supplement.
