

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ES Baker Steel Gold & Precious Metals Fund

Class B Accumulation (GBP), ISIN: GB00BNGMZG14
Equity Trustees Fund Services Ltd is the Authorised Corporate Director of the Fund

Objectives and investment policy

The investment objective of the Company is to grow the value of your investment (known as “capital growth”) in excess of the price return of MSCI ACWI Select Gold Miners IMI Index (the Target Benchmark) over a rolling 5 year period after the deduction of all fees.

Although the Company aims to deliver capital growth over a rolling 5 year period, there is no guarantee that this will be achieved over this time period, or any time period. The Company’s capital is at risk meaning that the Company could suffer a decrease in value and the value of your investment would decrease as a result.

The Company will seek to achieve its objective of capital growth through investing at least 70% of the Company’s total value in shares of companies that have direct underlying Gold and/or precious metals exposure or through companies worldwide whose core business is involved in the mining, refining, production and marketing of Gold and/or precious metals.

The Company may also invest up to 30% in other transferable securities, approved money market instruments, government and public securities, deposits, cash and near cash.

The Company may obtain indirect exposure to any permitted investment through the purchase of a Collective Investment Scheme, Exchange Traded Fund or an Exchange Traded Commodity. Investment via these vehicles will be limited to 10% of the Company’s total value and may include those operated and/or managed by the ACD or the Investment Manager.

The Company’s investment universe is not limited to the Target Benchmark components. The Company’s performance may therefore differ significantly from the performance of the Target Benchmark.

The Investment Manager will include, as part of its overall investment process, Environmental, Social, and Governance (“ESG”) factors when considering whether or not to invest in or sell particular shares. The Investment Manager may not invest in a company that falls within the parameters of the Company’s Exclusion Policy as stated in Appendix 3 in the Prospectus. The Investment Manager emphasises company-specific positive selection criteria over broad-based negative screens in assessing a company’s exposure to ESG factors.

The Company may use derivatives for the purposes of reducing risk or cost or for generating extra income or growth (known as “efficient portfolio management”). As an example, the Company may use forward contracts for currency hedging with the intention of reducing the risk arising from currency exposures in a cost-effective way.

The Company is actively managed, meaning the Investment Manager will use their expertise to pick investments to seek to achieve the Fund’s objectives.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- This Fund is ranked at 7 because funds of this type have experienced high rises and falls in value in the past. The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile. The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free. While the risk indicator takes into account the broader risk profile, the following risks are considered most relevant to this Fund:
- **Equity Securities Risk** Equities can lose value rapidly, and typically involve higher market risks than bonds, money market instruments or other debt instruments. Fluctuation in value may occur in response to activities of individual companies, the general market, economic conditions, or changes in currency exchange rates.
- **Small and Mid-Cap Stock Risk** Stocks of small and mid-size companies can be more volatile and less liquid than stocks of larger companies. Small and mid-size companies often have fewer financial resources, shorter operating histories, and less diverse business lines, and as a result can be at greater risk of long-term or permanent business setbacks.
- **Concentration Risk** In certain conditions the Sub-Fund may invest in a relatively small number of securities, which may result in portfolio concentration in sectors, countries, or other groupings. These potential concentrations mean that a loss arising in a single investment may cause a proportionately greater loss in the Sub-Fund than if a larger number of investments were made.
- **Liquidity Risk** There is a risk that adverse market conditions may affect the Fund's ability to sell assets at the price the Fund would like, or the Fund may have to sell them at a loss.
- **Currency Risk** To the extent that a Sub-Fund holds assets that are denominated in currencies other than the base currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses.
- **Emerging Markets Risk:** Where a Sub-fund invests substantially in securities listed or traded in emerging markets, the performance of the Sub-fund may be more volatile than a fund that invests in securities traded in developed countries.
- For further risk information please refer to the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charge	1.59%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another Fund).
- For the ongoing charge, the figure is at 31/12/2023.
- All charges and fees, except any investor dealing charges, have been included within the performance.
- For more information on performance fees and how they are calculated (including an explanation of hurdle rates) please refer to the Charges section of the prospectus.

Past Performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 04/09/2009.
- Share/unit class launch date: 28/07/2014.
- Performance is calculated in GBP.
- Δ Before this date the Fund had different characteristics.
- In December 2017 there were material changes to the Fund's investment objective and investment policy. The previous performance was achieved under circumstances that no longer apply.
- The Fund was previously known under the name TC Peterhouse Gold and Precious Metals Fund.

* From 1 August 2023, the Fund's benchmark changed from EMIX Global Mining Gold Index to the price return of MSCI ACWI Select Gold Miners IMI Index. Past performances before and after the change date shows the performance of respective benchmarks.
