Man GLG Strategic Bond Class I GBP Net-Dist MO Shares

(ISIN:IE00BGV1JX91) Man GLG Strategic Bond (the 'Fund') is a sub-fund of Man Funds plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

Objectives and investment policy

- The Fund seeks to provide a total return for investors, with a monthly income and the potential for capital growth.
- The Fund primarily invests in investment grade government and corporate bonds globally (which may be fixed or floating rate), cash and cash equivalents including deposits, treasury bills, certificates of deposit, bankers acceptances and commercial paper.
- The Investment Manager will select investments with a top-down assessment of the macroeconomic environment (evaluating the market as a whole rather than evaluating each individual fixed income asset), including the likely path of growth, inflation and interest rates, in various countries. The Investment Manager also carries out a proprietary credit analysis that includes close scrutiny of a company's balance sheet amongst a host of other important factors, to determine its assessment of the best investment opportunities.
- The Fund will have at least 80% of its Net Asset Value invested in sterling denominated securities, including cash or cash equivalents, non-sterling denominated securities hedged back to sterling or in any combination of both. The Fund shall not otherwise have any particular industry, geographical or sector focus.
- The Fund is actively managed; no benchmark is used as a universe for selection or for performance comparison purposes.
- The Fund may actively use financial derivative instruments (ie instruments whose prices are dependent on one or more underlying assets ("FDI")) to achieve the investment objective, for hedging against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- In addition to the above, the Fund may also invest in a number of other assets including currencies, money market instruments, floating rate notes, preference shares, debt securities, other funds, cash and other liquid assets. The Fund may increase its holdings of cash and other liquid assets in times of market turbulence.
- Income generated by the Fund will be distributed to investors who have elected for distribution payments and investors can buy and sell their shares on each Dealing Day of the Fund.
- Investment in the Fund is suitable for medium-term investors.
- The Fund's reference currency is GBP.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 4 as funds of this nature engage in strategies that typically have a moderate volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the Manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The Fund may invest a significant proportion of its assets in non-investment grade securities (such as "high yield" securities) are considered higher risk investments that may cause income and principal losses for the Fund. They are instruments which credit agencies have given a rating which indicates a higher risk of default. The market values for high yield bonds and other instruments tend to be volatile and they are less liquid than investment grade securities.
- The Fund may invest a significant proportion of its assets in securities with exposure to emerging markets which involve additional risks relating to matters such as the illiquidity of securities and the potentially volatile nature of emerging markets.

- The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.
 - The Fund will be exposed to credit risk on counterparties in relation to on-exchange traded instruments such as futures, options and 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to instruments on an organised exchange.
 - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
 - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
 - Whilst the Fund aims to provide capital growth over 3 years this is not guaranteed over any time period.
 - The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.
 - The Fund's use of FDI may result in increased leverage which may lead to significant losses.
 - There is no guarantee that the Fund will achieve its investment objective.
- A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.
