CT DYNAMIC REAL RETURN FUND (THE "FUND")

Class S Accumulation Shares (GBP) GB00BWWC6P48, a sub-fund of Columbia Threadneedle Opportunity Funds (UK) ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

- The Fund aims to provide a rate of return on your investment above inflation (defined as the Consumer Price Index (CPI)), and currently targets an average annual return of CPI +4% when measured over 3 to 5 years, before charges are deducted.
- Regardless of market conditions, the Fund also seeks to deliver a positive return over any 3-year period. However, positive returns are not guaranteed, and no form of capital protection applies.
- The Fund actively manages an exposure to bonds, company shares, money market instruments, cash, currencies, commodities, property and other alternative asset classes on a global basis. The exposure to these asset classes varies over time, as deemed necessary to achieve the investment objective, which may result in the Fund having little or no exposure to certain asset classes.
- The Fund obtains exposure to different asset classes by investing in other collective investment schemes (including funds managed by Columbia Threadneedle companies) or by using derivatives. The Fund may also invest directly in bonds (including government and corporate bonds), company shares, money market instruments, deposits and cash. The Fund does not invest in physical commodities or directly in property.
- In addition to using derivatives for investment purposes, derivatives may be used with the aim of reducing risk or managing the Fund more efficiently. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.
- Income from investments in the Fund will be added to the value of your shares.
- You can buy or sell shares in the Fund on any day that is a business day in London. You can find more detail on the investment objective and policy of the Fund in the Prospectus. For more information on investment terms used in this document, please see the Glossary available at columbiathreadneedle.com.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,  
Typically lower rewards

Higher Risk,  
Typically higher rewards

- The Fund is rated 5 based on the Fund's risk limit which indicates that it may show a medium to high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- As this Fund invests into other funds you should consider the underlying investments and overall risks.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- Positive returns are not guaranteed and no form of capital protection applies.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- The Fund targets returns in excess of inflation. In times of heightened inflation this may not be possible to achieve.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund's assets may sometimes be difficult to value objectively and the actual value may not be recognised until assets are sold.
- The Fund may invest materially in derivatives (complex instruments linked to the rise and fall of the value of other assets). A relatively small change in the value of the underlying investment may have a much larger positive or negative impact on the value of the derivative.
- All the risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

|               |       |
|---------------|-------|
| Entry Charge: | 0.00% |
| Exit Charge:  | 0.00% |

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

|                  |       |
|------------------|-------|
| Ongoing Charges: | 0.50% |
|------------------|-------|

### Charges taken from the fund under specific conditions

|                  |      |
|------------------|------|
| Performance Fee: | NONE |
|------------------|------|

The ongoing charges figure shown here is an estimate of the charges because recent changes made to the Fund mean that the historic figures do not accurately reflect its ongoing costs. The UK-non-UCITS' annual report for each financial year will include detail on the exact charges made.

For more information about charges please see the Fund's prospectus.
