# Schroder Digital Infrastructure Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B50MLC91)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

## Objectives and investment policy

### Objectives

The fund aims to provide capital growth by investing in equity and equity related securities of companies worldwide which help to advance the development of the global digital infrastructure and which the investment manager deems to be sustainable investments.

### Investment Policy

The fund is actively managed and invests at least 80% of its assets in a concentrated range of equity and equity related securities of companies worldwide (including emerging markets and less developed markets), which the investment manager deems to be sustainable investments, which are investments that contribute towards more environmentally resilient, socially inclusive and / or innovative digital infrastructure (please see the Fund Characteristics section of the Prospectus for more details). The fund typically holds 25 to 70 companies.

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability Information" on the fund's webpage, accessed via

[www.schroders.com/en/uk/private-investor/gfc](https://www.schroders.com/en/uk/private-investor/gfc).

The fund invests in companies that do not cause significant environmental or social harm and that have good governance practices, as determined by the investment manager's rating criteria (please see the Fund Characteristics section of the Prospectus for more details).

The fund may invest in companies that the investment manager believes will

improve their sustainability practices within a reasonable timeframe, typically up to two years.

The investment manager may also engage with companies held by the fund to challenge identified areas of weakness on sustainability issues. More details on the investment manager's approach to sustainability and its engagement with companies are available on the website

<https://www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/>.

The fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently (for more information please refer to section 6 of Appendix I of the Prospectus).

### Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against the MSCI All Country World (Net Total Return) Index.

### Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

### Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

## Risk and reward profile

### The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

### Risk factors

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Real Estate and Property Risk: Real estate investments are subject to a variety of risk conditions such as economic conditions, changes in laws (e.g. environmental and zoning) and other influences on the market.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Sustainable Investing Risk: The fund applies sustainability criteria in its selection of investments. This investment focus may limit the fund's exposure to companies, industries or sectors and the fund may forego investment opportunities that do not align with its sustainability criteria chosen by the investment manager. As investors may differ in their views of what constitutes sustainability, the fund may invest in companies that do not reflect the beliefs or values of any particular investor.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

## Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.97%
Charges taken from the fund under certain specific conditions	
Performance fee	
None	

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2023 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.95%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

## Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 18/02/2011.

The shareclass was launched on 18/02/2011.

Performance achieved between 2012 and 2016 was achieved under circumstances that no longer apply. The fund name and objective and policy changed on 19 February 2016.

Please note that the fund's investment objective, policy and benchmarks were changed on 07 February 2022.
