

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Allianz UK & European Investment Funds - Allianz Strategic Bond Fund Share Class I (Inc) (GBP)

Managed by Allianz Global Investors UK Limited,
part of Allianz Global Investors

ISIN: GB00BYT2QW81

Objectives and Investment Policy

The investment objective of the Fund is to maximise total return, consistent with preservation of capital and prudent investment management, by aiming to outperform (net of fees) the Target Benchmark, the BLOOMBERG Global Aggregate Total Return (hedged into GBP), over a rolling three year period. Investors should be aware that the Fund's capital is at risk and there is no guarantee that the Fund will achieve its investment objective over any particular period or at all.

We will invest at least 80% of the Fund's assets into conventional fixed income securities and indirectly through the use of derivatives. As part of the ACD's investment strategy the Fund will aim to have a low correlation with global equity markets measured over a rolling three year period. The ACD will have this correlation in mind when making investment decisions but will not be constrained by it (particularly, but not only, in scenarios where there is an increased correlation between bond and equity markets e.g. inflation or illiquid stress scenarios). The Fund will invest internationally although at least 80 % of its assets shall be invested in Sterling denominated (or hedged back to Sterling) debt securities. More than 35% of the value of the property of the Fund may be invested in securities issued or guaranteed by the following states; the UK, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United States of America. Up to 30% of the Fund's assets may be invested into Chinese Bonds in RMB either directly via CIBM Direct/Bond Connect or through all eligible instruments as set out in the Fund's investment policy. The Fund will typically invest in

investment grade debt securities (with fixed, variable or floating rates of interest and may vary inversely with respect to a reference rate) but will have the flexibility to on occasion invest up to 50% of the Fund's assets in debt securities that are rated below investment grade and unrated securities of a similar credit quality. We may also invest up to a maximum of 10% of the Fund in collective investment schemes. We may also utilise deposits, and other money market instruments. The Fund will make extensive use of derivatives for investment purposes and for efficient portfolio management (including for hedging).

The Fund is actively managed and will not be constrained by the benchmark.

Benchmark of the Fund is BLOOMBERG Global Aggregate Total Return (hedged into GBP).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the Fund.

You may redeem shares of the Fund usually on each business day by 12:00.

We usually distribute the income of the Fund on a semiannual basis.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 4 years.

Derivatives may be used to a large extent to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the Fund.

The categorisation of the Fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the Fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the Fund went up and down in the past. The units of a Fund of category 4 might be

subject to medium price fluctuations based on historical volatilities.

We may invest directly or indirectly a significant portion of the Fund into bonds or money markets instruments. Issuers of these may fall into insolvency or suffer economic problems, in which case the interest on and/or capital of these assets may not be completely paid and/or the price of the assets may drop.

The Fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the Fund price may fall.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the Fund over a year

Ongoing Charges	0.44%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the Fund's last financial year ending 31.08.2023. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the Fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the Fund in buying or redeeming its investments. This levy may be charged where the Fund is experiencing large levels of net purchases/redemptions and on "large deals" (i.e. deals of 2% or more of the value of the Fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the Prospectus.

Past Performance

Past performance is not a reliable guide to future performance. The past performance shown here takes account of all charges and costs with the exception of the entry and exit charge.

The Fund was launched in 2002.

The performance of the Fund is calculated in GBP.

Practical Information
