### Objectives and Investment Policy

The investment objective of the Fund is to seek to maximise total returns over the long term, defined as 5 – 10 years.

At least 80% of the Fund will be invested within UK equities, with an emphasis on smaller and mid capitalised companies. The Fund will have a concentrated portfolio of between 25 and 40 holdings when fully invested. The Investment Adviser will apply the methodology of Business Perspective Investing.

Business Perspective Investing identifies companies that exhibit criteria considered essential to the long term success of that business, and are expected to possess strong operating franchises and experienced management teams. Investments are to be made at a valuation deemed to provide shareholder value over the intended long term period of investment, not to be sold for short term profits. Further information regarding the investment criteria adopted in Business Perspective Investing can be obtained directly from the Investment Adviser or at <https://www.sanford-deland.com/15/aboutsdl/the-principles/business-perspective-investing>. UK equities are defined as shares of companies which are domiciled, incorporated or conduct a significant part of their business in the UK. The Fund may also invest in derivatives and forward transactions (for efficient portfolio management purposes). The Fund may borrow and may enter into underwriting transactions in accordance with COLL. The Fund may also invest in other transferable securities, money market instruments, units/shares in other collective investment schemes, deposits, warrants, cash and near cash. Performance may be measured relative to the performance of all the funds forming the official peer group of which the Fund is part. ‘Peer group’ is defined as being the Investment Association sector to which the Fund has been allocated (currently being the UK All Companies sector) or which it may be allocated in future, as determined by that body. Holders can buy, sell and switch shares in the Fund on any business day. Instructions must be received before 12 noon to buy shares at that day’s price. Any dividend income from the Fund is distributed and reinvested within the Fund in the case of accumulation on a half-yearly basis.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and retained and accumulated in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean ‘risk free’.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The Fund holds a concentrated portfolio of UK equities listed on the LSE or quoted on AIM/ISDX. Equities, as an asset class, tend to experience higher volatility than many other assets such as bonds or money market instruments. Funds concentrated by number of assets and/or geographic location are more vulnerable to market sentiment impacting on one or more of those assets or location and can carry a higher risk than funds holding more diversified assets.
- Liquidity risk: during difficult market conditions some securities, such as structured investments, corporate bonds and positions in emerging markets, may become more difficult to sell at a desired price.
- Counterparty risk: arising from securities which require a specific entity, usually a large bank, to honour its obligations to the Fund.
- Operational risk: arising from investments in overseas markets, in particular emerging markets countries, which may not have the same level of safekeeping and other controls as UK markets.
- Legal or tax risk: arising from a change in legal regulations, tax rules or the application of them.

All the risks currently identified as being applicable to the Fund are set out in the ‘Risk’ section of the Prospectus.
