

## Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Global Strategic Equity Fund

A sub-fund of Ninety One Funds Series ii  
managed by Ninety One Fund Managers UK Limited

Class I Accumulation shares portfolio hedged (AC) in  
sterling  
ISIN: GBOOBDGV6C12

### Objectives and investment policy

The Fund aims to provide capital growth (to grow the value of your investment) over at least 5 years.

The Fund invests primarily (at least two-thirds) in the shares of companies around the world and in related derivatives (financial contracts whose value is linked to the price of the shares of such companies).

The Fund focuses on investing in companies expected to become more profitable due to operational and/or structural improvements.

Investment opportunities are identified using in-depth analysis and research on individual companies.

These companies may be of any size and in any industry sector.

The Fund may also invests in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares in other funds (which may be managed by a Ninety One group company, or a third party) and derivatives.

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used in order to achieve the Fund's investment objectives or with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Investment Manager uses a currency hedging strategy (an investment technique which aims to protect the value of an investment against currency movements) that looks-through to the portfolio's investments and aims to reduce exchange rate risk for investments priced in currencies other than the currency of the share class.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The MSCI AC World Net Return Hedged GBP Index is used for performance comparison and risk management. The Fund does not seek to replicate the index.

The IA Global Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares. You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of the investments made by the Fund.

The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because the Fund invests in the shares of companies, whose values tend to fluctuate widely.

**Risks that may not be fully captured by the Risk and Reward Indicator:**

**Derivatives:** The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

**Emerging market:** These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

**Portfolio Currency Hedging:** Aims to protect investors from a decline in the value of the primary currencies of the underlying investments relative to the value of the share class currency, and investors will not benefit from an increase in the value of those currencies against the value of the share class currency. The costs of hedging emerging markets currencies can significantly lower hedged returns. Such hedging will not be perfect. Success is not assured.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2023. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

### One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge	0.88%
----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

## Past Performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 14 February 1994 and this share class on 31 January 2017.

- Class I Accumulation shares portfolio hedged (AC) in sterling
- MSCI AC World Net Return Hedged GBP
- IA Global

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
