

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## FTF Franklin UK Gilt Fund

**Class W (inc) • ISIN GB00BYZCTW34 • A sub-fund of Franklin Templeton Funds**

*The management company is Franklin Templeton Fund Management Limited which is referred to in this document as the authorised corporate director or "ACD".*

### Objectives and Investment Policy

The Fund aims to outperform the FTSE UK Gilts (All) Government Total Return Index over a three to five-year period from a combination of income and investment growth, after all fees and costs are deducted.

There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

#### Core investment

The Fund invests at least two thirds (but typically significantly more) in debt securities or bonds issued by the United Kingdom Government that pay interest (Gilts).

#### Other investments

The Fund may also invest in:

- Bonds or debt securities issued by governments of any nation (up to 20% of the Fund's portfolio);
- Bonds issued by government-related organisations;
- Bonds denominated in currencies other than British pounds (up to 10% of the Fund's portfolio); and
- Other collective investment schemes (which may include collective investment schemes operated by the ACD or any of its associates). The Fund may not invest more than 10% in other collective investment schemes.

The Fund can use derivatives for efficient portfolio management (managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth). Derivatives are financial contracts whose value is linked to the price of another asset, e.g. indices, interest rates, share prices or currencies.

#### Geographic locations (where we invest)

The Fund's focus is the UK. The majority of the Fund's investments will be in bonds issued by the UK government, although the Investment Manager has discretion to invest in any other country to a lesser extent.

#### How we select investments (investment strategy)

The Fund is actively managed, which means that the Investment Manager does not copy a benchmark when selecting investments for the Fund. The Investment Manager does not intend to invest in every security in the FTSE UK Gilts (All) Government Total Return Index.

All the investments will be in investment grade securities, (bonds that have been rated by independent agencies as high quality). In addition, the Investment Manager makes its own assessment of bonds to determine whether it believes investors will be adequately rewarded for any risk taken.

#### Additional information

- You may request the sale of your shares in the Fund on any UK business day.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within five years.

For the income share class shown in this document, dividend income is distributed to investors.

#### Terms to Understand

**Debt securities:** securities representing the issuer's obligation to repay a loan at a specified date and to pay interest.

**Collective investment schemes:** other investment funds, like the Fund.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

#### Why is the Fund in this specific category?

The Fund invests mainly in gilts and securities issued by the UK

government. Such securities have historically proven to present some stability over time and have benefited from a limited exposure to interest rates and movements in the bond market. As a result, the performance of the Fund can fluctuate over time.

#### Risks materially relevant not adequately captured by the indicator:

**Concentration risk:** the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities.

**Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the fund holds low-rated, sub-investment grade securities.

**Derivative instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

## Charges

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

*This is the maximum that might be taken out of your money before it is invested (in the case of the entry charge) or before money is paid out to you when you sell shares in the Fund (in the case of the exit charge).*

### Charges taken from the Fund over a year

Ongoing charges	0.34%
-----------------	-------

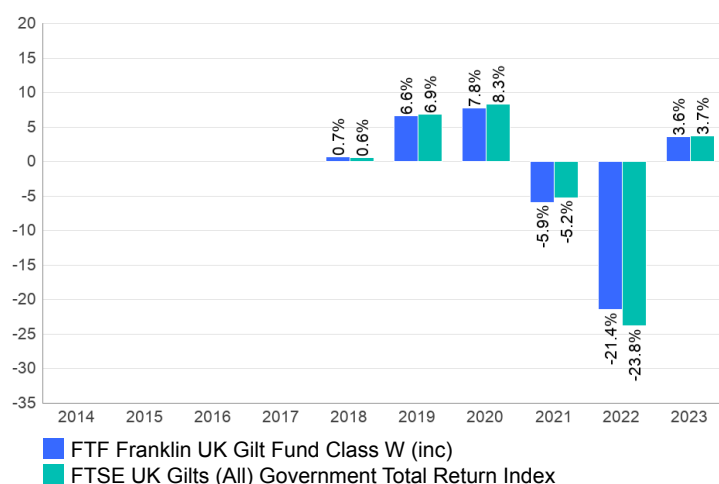

### Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

The ongoing charges figure is based on the expenses for the Fund for the year to December 2023 and it may vary from year to year. It is an estimate of the charges made to the Fund over a year to cover the costs of managing, operating, and distributing the Fund. Charges are deducted from the value of the assets held by the Fund and are reflected in the daily price that is used to buy and sell shares in the Fund. These charges reduce the potential growth of your investment and/or the income paid from it. For example, a Fund with an ongoing charges figure of 0.5%, means that an investor would pay £5 in charges over the course of a year for every £1,000 they had invested. Please note that the ongoing charge excludes some other costs (such as those incurred by the Fund when buying and selling securities) so total costs paid by investors each year may be slightly higher than the ongoing charges figure.

For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds and the Fund's annual report for details on the exact charges made.

## Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP.
- The Fund was launched in 2017.
- We measure performance against the Fund's performance target the FTSE UK Gilts (All) Government Total Return Index as it is widely available and reflects investments in similar debt-related securities.
