Pacific Multi-Asset Accumulator - Conservative Fund

GBP A Accumulating | ISIN: IE00BD6DG945

A sub-fund of Pacific Capital UCITS Funds plc
The Manager is Waystone Management Company (IE) Limited ("the Manager")
The Investment Manager of the Fund is Pacific Capital Partners Limited (the "Investment Manager")

Objectives and Policy

Investment Objective: The Fund's investment objective is to provide capital growth over the long term whilst attempting to limit the risk of capital loss.

Investment Policy: The Fund is considered to be actively managed, which means that the Investment Manager is not constrained by any index or benchmark in the selection of investments. The Investment Manager has discretion in managing the investments of the Fund.

The Fund invests principally in regulated underlying funds, including open-ended exchange traded funds and index tracker funds.

The Fund may also invest directly in certain securities, including fixed income instruments, equities, money market instruments, certificates and closed-ended funds where the Investment Manager believes such direct investment to be more efficient.

The Investment Manager may also seek to pursue a factor based investment strategy to isolate and take exposure to particular factors (value, momentum, carry or size) which drive risk and return within a given asset class or market.

The Fund is a multi-asset fund and may obtain exposure to a broad range of asset classes through its investment in underlying funds, direct securities and derivatives, including equity markets, fixed income, money markets, indices and currencies.

Exposure to equity markets will range between 20% to 60% of Net Asset Value.

The Fund may use exchange traded and OTC derivatives with the aim of risk or cost reduction or to generate additional capital or income in line with the Fund's risk profile. The Fund may also make extensive use of derivatives including more complex instruments or strategies to achieve the investment objective and these may result in leverage. In such situations performance may rise or fall more than it would have done otherwise, reflecting such additional exposure.

Income from the Fund's investments will be reinvested in the Fund.

Investors are able to buy and sell shares in the Fund on any day (except Saturday or Sunday) on which banks are open in Ireland and the UK.

Why is the Fund in this category? The lowest category does not mean 'risk free'. The Fund's risk category shown is based on historical data and is not guaranteed. Furthermore, it may not be a reliable indication of the future risk profile of the Fund

The Fund is categorised as a 4 because it is invested in financial markets and uses techniques and instruments which are subject to some level of variation which may result in gains and losses.

Additional risks that may have a significant effect on Fund performance includes:

- Fund of Fund Risk – Identifying appropriate underlying funds for investment by the Fund may be difficult and involves a high degree of uncertainty.
- Credit Risk – The Fund may be exposed to credit risks with regard to counterparties with whom it trades as well as risks relating to settlement default. Such risks could result in substantial losses.
- Derivative Risk – Use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities or more traditional investments.
- Currency Risk – Movements in currency exchange rates can adversely affect the return of the Fund. Currency hedging may be used to minimise the effect of this but may not always be successful.
- Liquidity Risk – Certain investments and types of investments are subject to restrictions on resale, may trade in the over-the-counter market or in limited volume, or may not have an active trading market and as a result may be subject to wide fluctuations in market value.

The value of the Fund's investments and the shares in the Fund may rise as well as fall and an investor may not get back the amount s/he invests. Any investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The risk category of the Fund is not fixed and may well change over time. A full list of risks applicable to this Fund can be found in the Prospectus and Supplement.
