

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Global Equity Select Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Equity Funds ICVC ISIN: GB00BF93W972

Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve capital growth over the long term (at least 7 years) by investing at least 80% in the shares of companies globally that are listed on a stock exchange.

The Fund's performance target is to outperform, after the deduction of charges, the MSCI World Net Total Return Index GBP (the "Index") by 2.5% per annum over rolling 3-year periods. For further information on the Fund's index, please refer to the Prospectus.

The Fund is actively managed.

Policy At least 90% of the Fund will be invested in shares of companies globally, both in developed and emerging markets.

The Fund may also invest up to 10% in other investment funds, known as collective investment schemes. Small investments may also be made in other transferable securities, money market instruments, cash and deposits.

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management (EPM).

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Capital Growth Capital growth is defined as the rise in an investment's value over time.

Rolling 3 Year Period A rolling 3-year period is any period of three years, no matter which day you start on.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 5 because its share price has shown a medium to high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Concentration risk The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Emerging Markets Risk Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.71%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 5 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay. The Fund was launched on 10 October 2017 and the share class on 5 March 2018.

Past performance is not a guide to future performance and may not be repeated. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested.

Practical information

Depository: HSBC Bank plc

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. For additional information on this fund (including the Supplementary Information Document), on other share classes of this fund and on other funds, or to obtain a free copy of the Fund’s Prospectus or the annual and semi-annual shareholder reports, call the information line or write to the registered office, details of which are below.
