This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## MI Select Managers UK Equity Fund ("the Fund") Institutional Accumulation Shares

This is a sub fund of MI Brewin Dolphin Investment Funds. The Fund is a non-UCITS retail scheme Open Ended Investment Company. ISIN: GB00BYWVF815  
Apex Fundrock Ltd is the Authorised Corporate Director of the Fund ("MI" and "MI Funds" are trading names of the ACD).

### Objectives and investment policy

The Fund aims to provide long term capital growth and income by investing primarily in the shares of UK listed equities and can also invest in investment funds that are targeted towards the UK.

UK listed equities are defined as companies that are domiciled, incorporated or have a significant part of their business in the UK.

Investment funds are defined as exchange traded funds, index tracking funds and other UCITS eligible schemes that are focused on the UK.

The Fund has a multi-manager structure, which means that its assets are managed by a number of specialist investment managers, appointed and monitored by the Fund's Asset Allocation Manager. Each of these investment managers has discretion to select investments for an assigned portion of the Fund's assets.

The Fund may also make use of derivatives, which are sophisticated instruments whose value is linked to the rise and fall of other assets. The Fund can use derivatives for investment purposes to generate market exposure that exceeds the value of its assets and for the purposes of hedging and efficient portfolio management, with the aim of managing risk and cost.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the Prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- As this Fund is focused on a single geographical region, it will have greater exposure to the market, political and economic risks of that region than if it was more diversified across several countries.
- This Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in losses or gains that are greater than the original amount invested.
- For further risk information please see the Prospectus.
