Fidelity S&P 500 Index Fund

a sub-fund of Fidelity UCITS II ICAV

Fidelity S&P 500 Index Fund P GBP Hedged ACC

(ISIN:IE00BYX5MZ81)

This fund is managed by FIL Investment Management (Luxembourg) S.A., Ireland Branch

Objectives and Investment Policy

Objective: The fund aims to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the S&P 500 Index (the "Index").

Investment Policy: The investment policy of the fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the fund's performance and that of the Index.

The fund will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index.

The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment Process: The fund uses a benchmark "index tracking" (also known as "passive") investment management approach by tracking the Index.

The Index is designed to reflect the performance of 500 stocks from top US companies in leading industries of the US economy which comply with S&P's size, liquidity and free-float criteria. These criteria are designed to identify those companies whose securities make up 85% of the publically traded market (i.e., the large and mid-capitalisation companies).

The Index comprises the equity securities of the relevant companies. The Sub-Fund is not sponsored, endorsed, sold or promoted by SPDJ, Dow Jones, S&P, nor any of their respective affiliates (collectively, "S&P Dow Jones Indices").

The prospectus and relevant supplement contains a more detailed description of the limited relationship S&P Dow Jones Indices has with Fidelity and any related funds.

For more information on the Index, please refer to the publically available information on the index provider's website at <https://www.msci.com/index-methodology>.

Base Currency: USD

Benchmark: S&P 500 Index, an index that does not take into account ESG characteristics. Used for: index tracking.

The Index is free float market capitalisation weighted and rebalances on a quarterly basis (or more frequently if required). Further details regarding the Benchmark Index (including its constituents) are available on the index provider's website at <http://supplemental.spindices.com/supplemental-data/eu>.

As of the date of this Supplement, the Index administrator has not been included on the ESMA register of administrators and benchmarks.

Distribution: As this is a non-distributing share class, dividends are reinvested.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high.
