Class C GBP Hedged Shares (ISIN IE00BFYV9H38)

Medalist Partners Total Return Fund (the 'Fund'), a sub-fund of GemCap Investment Funds (Ireland) PLC (the 'Company')

The Fund is managed by Gemini Capital Management (Ireland) Limited which acts as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to generate capital growth over the medium to longer term.

The Fund is considered to be actively managed in reference to the Bloomberg Barclays U.S. MBS Index (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes. Certain of the Fund's securities may be components of and may have similar weightings to the Benchmark. However, the Fund may deviate materially from the Benchmark and the Investment Manager may use its discretion to invest in companies or sectors not included in the Benchmark.

The Fund seeks to provide income and capital appreciation by investing directly into fixed income securities and/or gain exposure to fixed income securities through the use of Financial Derivative Instruments ('FDI').

The Fund's investment in fixed income securities are expected to have a special focus on the mortgage sector. "Fixed income securities" include mortgage-backed securities ("MBS"), asset-backed securities, corporate debt securities, residential mortgage-backed securities ("RMBS"), commercial mortgage-backed securities ("CMBS"), U.S. and other government agency securities, loan participations (as outlined below), collateralized loan obligations ("CLOs"), collateralized mortgage obligations ("CMOs"), variable and floating rate bonds.

The Fund may invest without limit in fixed income securities that are unrated or securities whose rating has been withdrawn. The Fund may invest without limit in such fixed income securities that are rated below investment grade (i.e., "high yield" or "junk" ratings). The Investment Manager considers a security to be below investment grade if it is rated below BBB (or comparable) by a nationally recognized credit rating organization including Standard & Poor's Ratings Services ('S&P') and Moody's Investor Service, Inc. ('Moody's'), or if unrated, determined by the Investment Manager, using best efforts and acting prudently, to be of comparable quality. MBS refers to a type of fixed income instrument that

represents an interest in a pool of mortgages, including RMBS and CMBS, and includes securities issued by government sponsored entities (agency MBS) as well as securities issued by private entities (non-agency MBS). MBS both include fixed and variable rate securities with underlying fixed or variable rate mortgage loans, respectively.

The fixed income securities in which the Fund may invest will typically be US securities and will be listed or traded on a regulated market. Whilst it is the intention that the Fund be fully invested as described above, the Fund may also invest in high-quality, short-term debt securities and Money Market Instruments where the Investment Manager considers it to be in the best interest of the Fund to do so for temporary defensive purposes.

The Fund may use FDI for investment hedging and efficient portfolio management. The FDI which the Fund may use may be exchange-traded or over-the-counter. These FDI may include futures (including treasury and equity futures, contracts for difference, forwards (including FX forwards), swaps and options on global fixed income securities that provide exposure to fixed income securities.

Income on investments will be paid quarterly. Dividends may be declared out of the capital of the Fund to preserve cash flow to shareholders.

There is a greater risk that capital may be eroded and distribution will be achieved in a manner that forgoes the potential future capital growth of your investment.

You can buy and sell your shares in the Fund on any day on which banks in Ireland, banks in the United Kingdom and the New York Stock Exchange are open for normal business.

The indicator above illustrates the position of this Fund on a standard risk/ reward category scale. This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested. The Fund is in category 4 because of the exposure to equity markets is minimal.

The following are risks materially relevant to the Fund which are not adequately captured by the indicator:

General Investment Risk: the securities in which the Fund invests are subject to normal market fluctuations and may fall as well as rise in value.

Liquidity Risk: At times, some shares or securities may trade infrequently which means it may be more difficult for the Fund to buy and sell them. In certain market conditions some assets in the Fund may become less liquid than at other times so selling at their true value and in a timely manner could become more difficult.

Credit and Counterparty Risk: There is a risk that the issuer of debt securities or a counterparty to a derivatives contract may not be able to meet interest, principal or settlement payments or otherwise honour their obligations.

Market Risk: The Fund may invest in securities and markets which experience specific risks due to increased volatility, liquidity, political and economic stability.

Custodial Risk: There may be a risk of a loss where the assets of the Fund are held in custody that could result from insolvency, negligence or fraudulent action of the custodian or sub custodian.

For a more detailed explanation of risks, please refer to the 'Risk Factors' section of the Prospectus and the 'Risk Warnings' section of the Supplement.
