

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Avellemy 5 Fund Class A Shares

A Sub-fund of the IFSL Avellemy OEIC (ISIN Income: GB00BJXFL674) (ISIN Accumulation: GB00BJXFL567)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The objective of the Sub-fund is to seek a combination of capital growth and income. This will be achieved whilst aiming to maintain the Sub-fund's risk rating classification as set by an independent asset allocator.

The Sub-fund has a risk rating classification of '5'.

The independent asset allocator has a risk rating range from '1' which is classified as the lowest risk to '10' which is classified as the highest risk.

As the Sub-fund is managed within the asset allocation limits of the risk rating this may limit the potential for capital growth and income.

The Sub-fund will be actively managed on a low to medium risk strategy and assets may be allocated to any geographical sector through gaining exposure to a range of asset classes by investing at least 70% in collective investment schemes. The asset class exposure is likely to have a mix of lower- and medium-risk investments such as cash, bonds and property, and higher-risk investments such as shares in companies.

The Sub-fund may also invest directly in cash, shares in companies, fixed interest securities (including government bonds), corporate bonds and structured products.

The Sub-fund will be fully invested save for an amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the Sub-

fund both generally and in relation to its strategic objective.

Whilst the Sub-fund itself will not use derivatives, the collective investment schemes purchased may have the ability to use derivatives to varying degrees.

The Sub-fund may invest scheme property in units/shares of schemes managed, operated or administered by the ACD (or one of its associates).

The Sub-fund will not maintain a direct interest in any immovable property or tangible moveable property.

The Investment Manager uses the MSCI Multi-Asset Dynamic Planner 5 index as a comparator for risk analysis purposes. This index combines the performance of various market indices. The Sub-fund's risk and return characteristics most closely align with the allocation of this index. To assess the performance of the Sub-fund, you may wish to compare it with this index.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

The Company uses Distribution Technology (DT) as its independent asset allocator.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

Bonds known as 'sub-investment grade' bonds generally produce a higher level of income, but carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/07/2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Non-UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 23 - 25 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	1.04%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Historic performance to 31 December 2023

	2019	2020	2021	2022	2023
Fund	-	4.3	9.7	-11.3	10.1
Benchmark	-	4.9	11.2	-7.5	9.4

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 15 April 2019.

This share class was launched on 15 April 2019.

Benchmark: Dynamic Planner 5.
