The Fund has been classified as an Article 9 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR").

The Investment Manager adds rigorous environment, social and corporate governance analysis for risk management and specific activity screens and limits for additional clarity and reassurance.

The Fund may declare dividends semi-annually on the following dates: 1 January and 1 July.

Investment in the Fund may be suitable for investors with a medium to long term investment horizon.

The Fund is actively managed and is not managed in reference to a benchmark.

## RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

In addition to the above, the risk and reward indicator:

- is based on historical data and may not be a reliable indication for the future;
- The Fund is in category 5 because of the medium range and frequency of price movements of the underlying investments the Fund invests in;
- the category is not guaranteed and may change over time; and
- the categorisation of the Fund may shift over time.

The lowest category does not mean that a share class is risk free. Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by the following:

- **Market risk:** The Fund's investments are subject to market fluctuations, so they can fall as well as rise in value.
- **Currency risk:** The Fund's underlying currency is Sterling. Fluctuation in exchange rates may reduce investment gains or income and increase losses, both for the Fund's investments in currencies other than Sterling or for your own investments in Sterling Share Classes.

- **Emerging market risk:** The Fund may invest in newly established companies in the Asia Pacific Region, whose future is dependent on (i) widespread adoption of their products and services and (ii) timely implementation of anticipated changes in local governmental policies; investments in companies in emerging markets or less developed countries in the region may face more political, economic or structural challenges than developed countries, putting your money at greater risk, and may be negatively impacted by changes in government policies, changes in taxation, restrictions in foreign investment and the movement of money from one country to another, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.

- **Liquidity risk:** Substantial selling by shareholders may necessitate the Investment Manager having to sell investments, incurring losses that would otherwise not have arisen.

- **Investment risk:** The Fund may invest in Participatory Notes (an instrument that is similar to owning shares) which may expose investors to losses where the issuer of the Participatory Note becomes insolvent or defaults on their obligations.

- **Sustainability risk:** Sustainability risks are environmental, social and governance events or conditions whose occurrence could have an actual or potential material negative impact on the value of the Fund and all known types of risk of the Fund.

An extended discussion of the risks associated with an investment in the Fund is set out in the Prospectus under 'The Company - General Risk Factors', as well as the Fund Supplement.
