KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

AEGON Asset Management

Aegon Global Short Dated Climate Transition Fund

a sub-fund of Aegon Asset Management Investment Company (Ireland) plc

Sterling Class S - Accumulation shares (ISIN: IE00BL1GHK20)

This fund is managed by Aegon Investment Management B.V.

Objectives and investment policy

Objective: to provide a return (income plus capital).

Policy: invests predominantly in global investment grade (lower risk) bonds. The fund may also hold selected high yield (higher risk) bonds, contingent convertible (higher risk) bonds and cash. Bonds will be issued by companies and governments worldwide. A minumum of 80% of the Fund's net assets will be invested in investment grade bonds that have a residual maturity that does not exceed four years.
The Fund is actively managed.

The Fund may also invest in derivatives (financial contracts whose value is linked to an underlying asset).

The Fund may invest up to 20% in emerging markets. In investment terms, this means those economies that are still developing.

- Up to 20% of the Fund's net assets may be invested in High Yield Bonds. Up to 10% of the Fund's net assets may be invested in contingent convertible bonds, which may be used to enhance returns within the Fund's portfolio, while also diversifying the Fund's portfolio.
- The Fund may invest in use-of-proceeds labelled bonds (including green, blue, or other sustainability[1]themed bonds), which are bonds the proceeds from which are used for specific projects or investments. Green bonds provide finance for environmentally and/or climate friendly projects and blue bonds provide finance for marine and ocean based projects or investments. The Fund may also invest in sustainability[1]linked bonds, which are bonds for which the financial and/or structural characteristics are tied to predefined sustainability or ESG objectives. The Fund's exposure to such use-of-proceeds labelled bonds and sustainability-linked bonds is currently not material, however this may change over time and is not subject to any aggregate limit.

Within the limits set out above, the Fund has discretion in its choice of investments and is not restricted by market sector. It may also hold a limited range of other investments and it is not constrained by any benchmark or index.

The Fund may use investment techniques to manage risks and costs. These techniques include 'hedging' (using derivatives to reduce the risk associated with making investments in other currencies).

The Fund may make investments in any currency although the Investment Manager will hedge the majority of currency exposure arising from bond positions back to the Fund's Base Currency.

The Fund adheres to environmental, social and governance ('ESG') criteria for all of its bond investments (excluding collective investment schemes, index derivatives and ancillary cash) which combines screening investments along with ESG risks, performance assessment and climate related transition fundamental analysis. The Investment Manager will use it's proprietary ESG framework to assign an ESG category to each bond investment ranging from 1to 5, with 1 being the highest category and 5 the lowest. The Fund will invest at least 90% of its assets in those securities with ESG categories 1, 2, or 3, with up to 10% in securities identified as ESG category 4. The Fund will not invest in securities with ESG category 5. In addition, the Investment Manager will assess climate related transition readiness and net zero alignment of issuers with a focus on supporting the energy transition by limiting exposure over time to companies which are categorized as 3-Transitioning, 4- Unprepared, or 5- Laggard. Please see the Fund's Supplement for a full description of the Investment Manager's ESG framework and criteria.The fund promotes E/S (i.e Environmental and Social) characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation (SFDR).

Target Benchmark: The Investment Manager expects that the Fund will return performance at a rate of SONIA plus 1.25% per annum, over a period of between 1 to 3 years gross of fees and expenses of the Fund. SONIA, is the effective overnight interest rate paid by banks for unsecured transactions in the British sterling market. Although the Fund expects to reach this level of performance, there is no guarantee that this will be achieved. The Fund's capital is at risk meaning that the Fund could suffer a decrease in value at any time.

Comparator Benchmark: SONIA Compounded Index Total Return GBP. Comparison against this index will allow investors to compare the Fund's performance against that of a representative but not identical universe of the Fund's potential investments. Comparison against this index will also allow investors to judge the active nature of the Fund against performance of an index which could reflect the performance of equivalent passive funds. The SONIA Compounded Index Total Return GBP will be used as a reference point to compare the Fund's carbon intensity. The Fund will have at least 30% lower weighed average carbon intensity versus this comparator index.

Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

Risk and reward profile

1	2	**3**	4	5	6	7

Lower risk / potentially lower rewards — **Higher risk / potentially higher rewards**

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which funds of this type changed in the past. This Fund has the above risk/reward rating because bond prices can be affected by political or economic events and changes in exchange rates.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'.

Note: as there is less than 5 years' performance data available (see Past performance section), the risk/reward profile is calculated using simulated historical data.

The following risks which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

Credit: An issuer of bonds may be unable to make payments due to the Fund (known as a default). The value of bonds may fall as default becomes more likely. Both default and expected default may cause the Fund's value to fall. High yield bonds generally offer higher returns because of their higher default risk and investment grade bonds generally offer lower returns because of their lower default risk.

Liquidity: The Fund's value may fall if bonds become more difficult to trade or value due to market conditions or a lack of supply and demand. This risk increases where the Fund invests in high yield, off-benchmark or emerging market bonds.

Counterparty: Investments such as derivatives are made using financial contracts with third parties. Those third parties may fail to meet their obligations to the Fund due to events beyond our control. The Fund's value could fall because of: (i) loss of monies owed by the counterparty; and/or (ii) the cost of replacement financial contracts.

Other markets: The Fund may invest in countries which have less developed political, economic and legal systems and which provide fewer investor protections. Difficulties in buying, selling, safekeeping or valuing investments in such countries may reduce the value of the Fund.

Concentration risk: The Fund may invest more than 35% of its value in securities issued by a single Government or other Public issuer. Holding a limited number of underlying investments means a change in the value of any one investment has more impact on the Fund's value. This increases potential gain but also potential loss.

Derivatives: The value of derivatives depends on the performance of an underlying asset. Small changes in the price of that asset can cause larger changes in the value of the derivative. This increases potential gain but also potential loss.

Interest Rate Risk: Bond values are affected by changes in interest rates. When interest rates rise, the value of the Fund is likely to fall.

Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.18%
Charges taken from the fund under certain specific conditions	
Performance fee	None

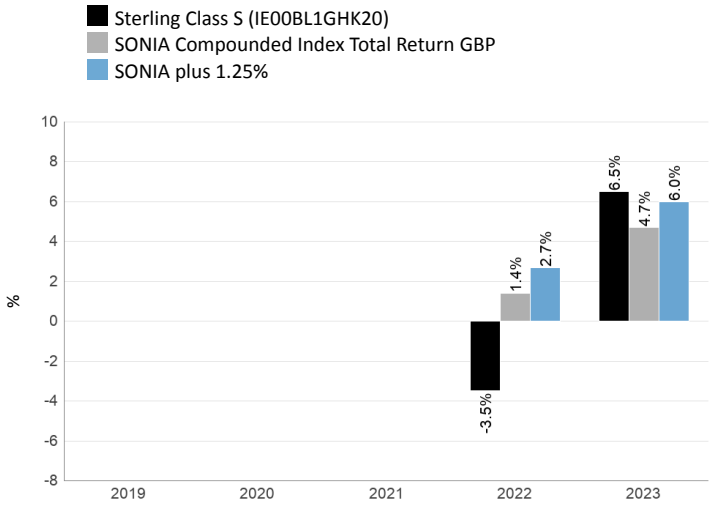

The entry and exit charges shown are the maximum figures, and in some cases you may pay less. You can find out specific charges which apply to your investment by contacting your financial adviser, distributor, or by contacting us using the details given in the Practical Information section.

The ongoing charge is based on expenses for the year to 31 December 2023. This figure may vary from year to year. It excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

Exchanging your holdings into another sub-fund of the Company: the first five exchanges in a calendar year are free, and subject to a charge of 1.5% on each transaction thereafter.

More detailed information on charges can be found in the 'Fees and Expenses' section of the Fund Supplement to the Prospectus.

Past performance

Source: Lipper

Past performance is not a guide to future performance.

Fund launch date: 30 January 2020
Share class launch date: 04 March 2021

Performance is calculated in GBP.

The past performance calculation does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the 'Charges' section.
