Schroder Blended Portfolio 7

a sub-fund of Schroder Investment Solutions Company

Class Z Accumulation GBP (GB00BF77ZX64)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth and income by investing in a diversified range of assets and markets worldwide with a target average annual volatility (a measure of how much the fund's returns may vary over a year) over a rolling five year period of between 75% to 90% of that of global stock markets (represented by the MSCI All Country World Index). The fund is part of the SISCO Schroder Blended Portfolio range, which offers six funds with different expected combinations of investment risk and return. This fund is risk level 7, which aims to be the second highest risk fund in this range with the second highest equity weighting.

Investment Policy

The fund is actively managed and invests its assets in collective investment schemes, closed ended investment schemes, real estate investment trusts and exchange traded funds which themselves invest worldwide in any of the following:

- (A) equity or equity related securities;
- (B) fixed income securities (including government bonds and corporate bonds);
- (C) currencies;
- (D) alternative assets; and
- (E) derivatives.

Alternative assets may include funds that use absolute return strategies or funds that invest indirectly in real estate and commodities. The fund seeks to achieve the target volatility range by varying the weighting of

asset types. During the relevant rolling five year period the fund's volatility may be higher or lower than the target range if the investment manager believes it is necessary to seek to mitigate potential losses. The fund's potential gains and losses are likely to be constrained by the aim to achieve its target volatility range.

The fund invests between 40% and 85% of its assets in equity and equity related securities.

The fund may invest up to 20% of its assets in Schroder funds. The fund may also hold cash.

The fund will not use derivatives directly.

The reference to "blended" in the fund's name reflects that within the framework of the fund's long term strategic priorities, the investment manager invests in a blend of actively managed third party funds and passive index-tracking third-party funds.

Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against the Investment Association Mixed Investment 40-85% shares sector average return.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

The risk and reward indicator

The risk category is based upon the fund's risk target and there is no guarantee that the fund will achieve it.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Performance risk: Investment objectives express an intended result but there is

no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Charges

One-off charges taken before or after you invest
