

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

PIMCO Climate Bond Fund

a sub-fund of PIMCO Funds: Global Investors Series plc
PIMCO Global Advisors (Ireland) Limited, part of Allianz, manages this fund.

ISIN: IE00BLH0Z268
Share class: Institutional GBP (Hedged) Accumulation

Objectives and Investment Policy

Objective The fund aims to maximise optimal risk adjusted returns on your investment through primarily investing in a diversified portfolio of fixed income securities and instruments while giving consideration to long term climate related risks and opportunities. Through consideration of long term climate related risks and opportunities, the fund aims to contribute to climate change mitigation and adaptation.

Investment Policy The fund aims to achieve its objective by investing under normal circumstances at least 80% of its total assets in a diversified portfolio of fixed income securities and instruments (which are similar to loans that pay a fixed or variable rate of interest), of varying maturities.

As part of the fund's commitment to invest in sustainable investments as further outlined in the fund's supplement, the fund will ordinarily be comprised of labeled and unlabeled (issued without formal certifications) green fixed income securities as well as the debt of issuers demonstrating leadership in addressing risk and opportunities around climate related change. Labeled green fixed income securities are those issues with proceeds specifically earmarked to be used for climate and environmental projects. The fund may also invest in any of the other types of ESG Fixed Income Securities (as further described in the section of the company's prospectus entitled "ESG Fixed Income Securities").

The fund will employ the use of an exclusion strategy. The fund will not invest in the securities of any issuer determined by the investment advisor to be engaged principally in Fossil Fuel related sectors (including issuers engaged principally in the fossil fuel industry, including distribution/retail, equipment and services, extraction and production, petrochemicals, pipelines and transportation and refining, and the mining and distribution of coal and coal fired generation), but excluding biofuel production, natural gas generation, transportation, distribution and sales and trading activities. However, ESG Fixed Income Securities from issuers involved in Fossil Fuel related sectors, as described above, may be permitted. The fund will not invest in the securities of any sovereigns scoring weakest on transparency and corruption indices and the fund will not invest in any issuer determined to be engaged principally in the manufacture and distribution of alcoholic beverages and tobacco products, the manufacture of military weapons, the operation of gambling activities, or the production or trade of pornographic materials. The investment advisor may also exclude an issuer based on other criteria such as involvement in poor environmental practices, weak corporate governance, corrupt business practices, violation of human rights or unacceptable labour practices.

In addition, the investment advisor will actively engage with certain issuers as applicable in order to seek to improve their sustainability practices or preparations for a low carbon economy (examples may include material

climate and biodiversity related matters), including encouraging issuers to align to the Paris Agreement, adopt science-based targets for carbon emissions reduction and/or broadly advance their sustainability commitments.

The fund will reference its performance against the Bloomberg MSCI Green Bond Index USD Hedged (the "Index"). The fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the fund's securities may be components of and may have similar weightings to the Index. However the Index is not used to define the portfolio composition of the fund or as a performance target and the fund may be wholly invested in securities which are not constituents of the Index.

The securities will be both "investment grade" and "non-investment grade". Non-investment grade securities are considered to be riskier investments than investment grade securities, but typically produce a higher level of income.

The average portfolio duration of the fund will normally vary between 2 to 8 years based on the investment advisor's forecast for interest rates. Duration measures the sensitivity of the assets to interest rate risk. The longer the duration the higher the sensitivity to changes in interest rates.

Investments may also be linked to emerging markets countries, which in investment terms are those economies that are not developed.

The fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying assets.

The assets held by the fund may be denominated in a wide variety of currencies with non-USD currency exposure limited to 20% of total assets. The investment advisor may use foreign exchange and related derivative instruments to hedge or implement currency positions.

For full investment objectives and policy details please refer to the fund's prospectus.

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Share Class Currency Hedging This share class seeks to limit the shareholder's currency risk by reducing the effect of exchange rate fluctuations between the share class currency and any non-active currency exposures of the fund.

Dealing Day You can buy and sell shares on most working days in Dublin, exceptions to this are more fully described in the fund holiday calendar available from the Administrator.

Risk and Reward Profile

- The indicator above is not a measure of the risk of capital loss, but a measure of the fund's price movement over time.
- It is based on historical data and thus may not be a reliable indication for the future.
 - The indicated risk category is not guaranteed and may shift over time.
 - The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
 - The risk indicator is based on the volatility of the fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by benchmark data or simulated historical series as appropriate.
 - The fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

- Credit and Default Risk** A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.
- Currency Risk** Changes in exchange rates may cause the value of investments to decrease or increase.
- Derivatives and Counterparty Risk** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.
- Emerging Markets Risk** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses.
- Fixed Income Risk** There is a risk that the institution which issued the securities will fail, which would result in a loss of income to the fund. Fixed income values are likely to fall if interest rates rise.
- Liquidity Risk** Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.
- Interest Rate Risk** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).
- Mortgage Related and Other Asset Backed Securities Risks** Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.

Charges

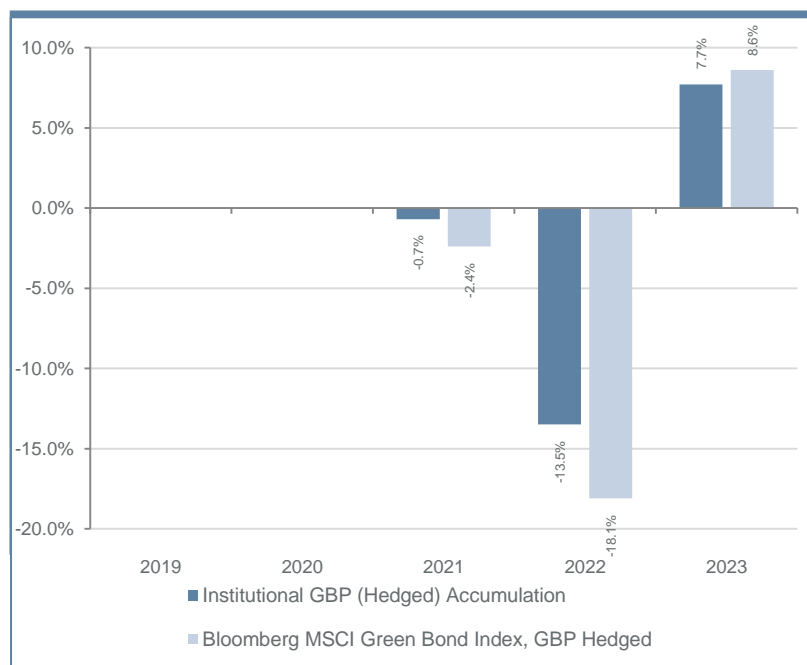

The charges you pay are used to pay for the costs of running the fund, which include the marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.52%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The ongoing charges figure is based on expenses for the year ending 2023. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section of the prospectus entitled "Fees and Expenses", which is available at www.europe.pimco-funds.com.

Past Performance

- Past performance is not an indicator of future returns.
- Past performance does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.
- The performance of the class is calculated in British Pounds.
- The fund launched in September 2020. This class started to issue shares in September 2020.

Practical Information

Depository State Street Custodial Services (Ireland) Limited.

Prospectus and further information Further information on the fund or other share classes or sub-funds of the Company, including the prospectus, the most recent annual report and subsequent semi-annual reports of the Company, may be obtained from the Administrator, as are the latest share prices.
