

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Name of Product: Invesco Summit Responsible 1 Fund (UK), Accumulation Z share class

ISIN: GB00BMFKGW29

Website: www.invesco.com/uk

Call 0800 085 8677 for more information.

Invesco Fund Managers Limited is the Authorised Corporate Director (the 'Manager') and the Alternative Investment Fund Manager of the product and is authorised and regulated by the Financial Conduct Authority.

This Key Information Document is accurate as at 9 April 2024.

What is this product?

Type

The Fund is a sub-fund of the Invesco Summit Growth Investment Series, an open-ended umbrella investment company with variable capital, incorporated in England and Wales and authorised as a non-UCITS retail scheme.

Objectives

- The Fund aims to grow the amount invested over the long term (5 years plus).
- The Fund aims to achieve its investment objective by pursuing the Fund's ESG strategy and have a risk profile of 15% - 45% as measured by the volatility (a measure of the size of short-term changes in the value of an investment) of global equities with reference to the MSCI AC World Index.
- The Fund has exposure to a variety of asset classes globally including shares of companies, fixed interest and other debt securities, property, commodities and cash. Due to its risk profile, the Fund will typically have a higher exposure to debt securities compared to other funds in the Invesco Summit Responsible range.
- The Fund intends to invest 100% of its assets (excluding cash) in investments that meet ESG criteria. The Fund invests at least 80% of its assets in ESG collective investment schemes (typically passive funds including exchange traded funds and index-tracking funds managed by Invesco) that typically aim to track indices and apply all or some of the following methodology:
 1. Negative ESG screening by which certain sectors may be excluded, for example, weapons, oil sands, coal and tobacco.
 2. Positive ESG screening or tilting increasing overall exposure to those companies demonstrating a robust ESG profile and/or a positive trend in improving that profile.
- For developed market government bond exposure, the Fund invests in funds that meet the fund manager's ESG criteria using an internal methodology which rates each country based on their ESG profile.
- The Fund may use derivatives (complex instruments) for investment purposes and to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Fund is actively managed and is not constrained by a benchmark.
- The reference to (UK) in the Fund's name only relates to its domicile and not to its objective and investment policy.
- You can buy, sell and switch shares in the Fund on any Dealing Day (as defined in the prospectus).
- Any income from your investment is reinvested.
- Recommendation: The Fund may not be appropriate if you plan to withdraw your money within 5 years.
- More information can be found in the Fund's Responsible Investment Policy document, available on its product page on our website (www.invesco.co.uk).

Intended Retail Investor

The Fund is intended for investors aiming for long term capital growth achieved through an ESG strategy, who may not have specific financial expertise but are able to make an informed investment decision based on this document and the Prospectus, have a risk appetite consistent with the risk indicator displayed below and understand that there is no capital guarantee or protection (100% of capital is at risk).

Term

The Fund does not have a maturity date and may only be terminated in accordance with the terms set out in the Prospectus.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This figure rates the likelihood of losing money in the future at a medium-low level.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and you may not get back the full amount invested. Over time, inflation may erode the value of investments.

The product's use of financial derivatives may result in the product being leveraged, that is, the economic exposure created by using a derivative may be greater than the amount invested. The product, therefore, has the potential to lose more than it paid. If a counterparty becomes insolvent this will also result in a loss. The

use of certain derivatives may also impair the product's liquidity which may mean the product has to close positions at an unfavourable price.

The issuers of the debt securities to which the product is exposed may not always make interest and other payments due to financial difficulties or insolvency. The value of the debt securities may fall due to poor market conditions, such as a decrease in market liquidity, and/or variations in interest rates. These risks increase where the product invests in high yield, or lower credit quality, bonds.

The value of the equity securities to which the product is exposed may fall in response to certain events, including the activities and results of the issuer, macroeconomic environment and market conditions.

The product may be exposed to securities of emerging and developing markets, where difficulties in relation to market liquidity, dealing, settlement and custody problems could arise which could result in losses.

The use of ESG criteria may affect the product's investment performance and therefore may perform differently compared to similar products that do not screen investment opportunities against ESG criteria.

The product's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

See Section 31 - 32 of the Prospectus for more details of risk factors.

Investment performance information

The return to the investor depends directly on the performance of the Fund, which depends on the performance of the underlying funds it invests in and the income they generate.

The performance of each of the underlying funds depends on the performance of the individual investments invested in, which is determined by their market value. As the performance of markets varies across geographical regions, asset classes and over time, the return of the Fund also depends on the level of exposure it has to each market via the underlying funds over time. The level of exposure to each market is determined by the fund manager, based on the objective of the Fund, and their view of the future performance of the relevant markets.

The performance of the Fund may also be affected by the strength of world currencies relative to Sterling.

The Fund is actively managed and is not constrained by any benchmark. There is no benchmark against which the performance of the Fund can appropriately be compared. However, investors may wish to compare the performance of the Fund against other funds within the Investment Association Mixed Investments 0-35% Shares Sector.

The Fund aims to have a risk profile of 15% - 45% (as measured by the volatility of global equities with reference to the MSCI AC World Index).

What could affect my return positively?

Your return may be positively affected by an increase in the value of the fixed interest and other debt securities, shares of companies, property and commodities the Fund is exposed to via the underlying funds, as a result of good general economic conditions, positive market specific events and positive events specific to an individual investment or group of investments.

What could affect my return negatively?

Your return may be negatively affected by a decrease in the value of the fixed interest and other debt securities, shares of companies, property and commodities the Fund is exposed to via the underlying funds as a result of:

poor general economic conditions, negative market specific events or negative events specific to an individual investment or group of investments; and the additional risks described under the section entitled 'What are the risks and what could I get in return?'.

If you sell your investment in the Fund under severely adverse market conditions, you are likely to make a loss or a very low return on your investment.

What happens if Invesco Fund Managers Limited is unable to pay out?

The Financial Services Compensation Scheme offers compensation when an authorised firm is unable to pay claims against it, usually because the firm has gone out of business. The Fund is covered by the Financial Services Compensation Scheme. You may be entitled to compensation from the scheme if the Fund cannot meet its obligations.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest £ 10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Example Investment: 10,000 £

Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of 5 years
Total costs	33.99 £	108.54 £	192.55 £
Impact on return (RIY) per year	0.34%	0.34%	0.34%

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	0.00%	We do not charge an entry fee for this product, but the person selling you the product may do so.
	Exit costs	0.00%	We do not charge an exit fee for this product, but the person selling you the product may do so.
Ongoing costs	Portfolio transaction costs	0.08%	The impact of the costs of us buying and selling underlying investments for the product. These costs are after the offset of the anti-dilution benefit to the extent that the benefit does not take the total transaction costs below zero. The total anti-dilution benefit is 0.02%.
	Other ongoing costs	0.26%	The impact of the costs that we take each year for managing your investments.
Incidental costs taken under specific conditions	Performance fees	0.00%	There is no performance fee for this product.
	Carried interest	0.00%	There are no carried interests for this product.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

We have selected 5 years as the product invests for the long term.

You can sell some or all of your investment in the product on any Dealing Day by writing to us or telephoning us as described in the Prospectus.

If you sell some or all of your investment before 5 years the product will be less likely to achieve its objectives however, you will not incur any additional costs by doing so.

How can I complain?

You should write to the Head of the Contact Centre at our administration centre address: Invesco Administration Centre, PO Box 586, Darlington, DL1 9BE, UK. If your complaint is not resolved by us to your satisfaction, you may be entitled to refer it to the Financial Ombudsman Service at Exchange Tower, London E14 9SR, UK. Visit www.financialombudsman.org.uk for more details of this service. We will inform you of your rights when answering your complaint. A summary of our internal process for dealing with complaints is available on request.
