CitiCode	00G7

\*This is on top of any product or adviser charge you pay and includes a fixed management fee plus expenses that vary with the day to day costs of running the fund. Expenses can include costs paid by Aegon to third parties. The fund charges may differ for Retirement (RR) or Aegon One Retirement (AOR).

## About fund performance

Investors should always consider performance in relation to the objective of the fund and over periods of at least five years. If a fund has risen in value, it doesn't mean it is meeting its objective – especially if the fund is aiming to outperform a particular benchmark or meet a risk target. The same applies if the fund has fallen in value.

## Our risk rating

Above average risk funds typically invest in one single investment type or geographical region, for example regional equities (shares) or global bonds. This means that investors are completely exposed to the performance of that single investment type or region. These funds could experience lengthy periods where their value goes down depending on market conditions. However, these funds can also rise in value quite significantly and have historically provided good long-term growth. Because of their narrow investment focus, they're better suited to investors with at least five years to invest and to use in combination with other funds as part of a diversified portfolio.

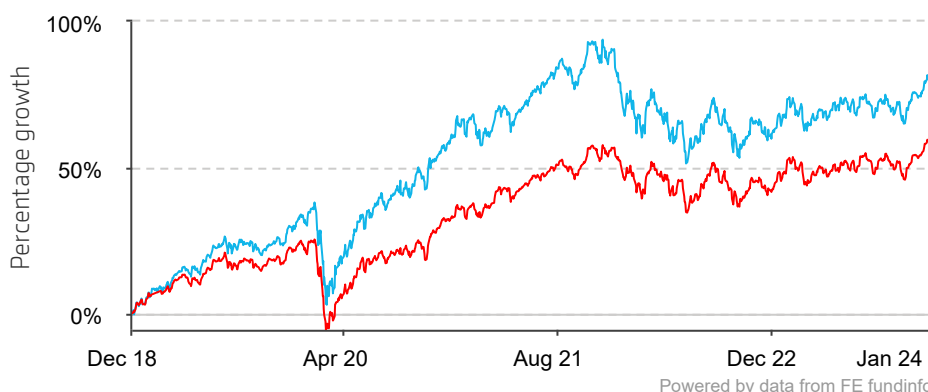

## Fund objective

The fund uses a two-stage investment process called lifestyling. It aims to perform better than its benchmark in the early years (the growth stage) and give you more certainty about the amount of pension you can buy via an annuity when you retire (the lifestyle stage). Growth stage: the fund aims to provide long-term capital growth by investing wholly in our Global fund, which in turn invests in several of our regional and specialist funds. The Global fund mainly invests in equities (shares) in a range of international companies, but may also hold a small proportion in fixed income (bonds) and cash. Lifestyle stage: The lifestyle stage starts five years before the start of your target retirement year and recognises that your priorities may change as retirement approaches. It assumes you'll buy an annuity to provide yourself with an income for life (or a specified number of years) when you retire. We'll progressively start switching your investment into our Long Gilt fund, with the aim of giving you more certainty about the level of annuity you'll be able to buy when you retire. We'll also move some of your pension pot into our Cash fund in the final year of your investment to cater for your tax-free cash entitlement. You can choose how much of your cash entitlement you want to take, but our process assumes you'll take the maximum which, based on current legislation, is 25% of your pension pot.

## Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 31 Dec 2023 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.

Crown rating	

## Fund manager information

This fund is an Aegon Solution. This means it is a pre-built fund Aegon have created to offer whole investment strategies in a single fund with the aim of making investing easier. We reserve the right to add, remove and replace the underlying funds within this solution with the aim of making sure the fund continues to meet its aims and objectives. Sometimes we work with external fund managers and they select and manage the underlying funds on our behalf. The additional charges/expenses may change when underlying funds are replaced, added or removed from the portfolio or when weightings between the underlying funds are changed. Please note, there's no guarantee the fund will meet its objective.

## Risks specific to this fund

There is no guarantee the fund will meet its objective. The value of an investment can fall as well as rise and investors could get back less than they originally invested. All funds carry a level of risk and the information below outlines the key risks for this fund.

---

**Currency risk** - this fund invests overseas so its value will go up and down in line with changes in currency exchange rates. This could be good for the fund or bad, particularly if exchange rates are volatile.

---

**Third party risk** - in the event that the underlying investments which the fund invests in suspend trading, Aegon may defer trading and/or payment to investors. The value ultimately payable will depend on the amount Aegon receives or expects to receive from the underlying investments.

---

**Derivative risk** - this fund will use derivatives in a number of ways to achieve its objectives. Holdings may add up to over 100% because derivatives offer a way to gain exposure to the returns of a specified equity or bond market without having to directly own it. These negative figures are not shown within the top holdings section. Derivatives allow a manager to buy or sell an investment at a specified future date for a specified price. However, this means the fund could be exposed to additional risks if the market moves up when the manager expected it to go down or vice versa.

---

**Lifestyle strategy risk** - long gilts and long corporate bonds are used in lifestyle strategies because of their inverse relationship with annuity rates, not because they are 'safe' investments. When long bonds go down annuity rates generally go up and vice versa, meaning the size of annuity you can buy stays roughly the same whether bonds go up or down. But, this relationship isn't perfect and can fail, for example there can be a delay between changes in long bond values and annuity rates.

---

**Post-retirement risk** - if you don't buy an annuity on your retirement date, you'll remain invested 75% in long-dated bonds (government bonds only or a mix of government and corporate bonds) and 25% in cash until you tell us what you want to do. This mix isn't designed for long-term investing and returns may not keep pace with inflation, meaning the real value of your fund may fall.

---

**Lifestyle performance information** - this factsheet contains information and performance for the 'Growth stage' of the lifestyle fund. The information and performance for your fund will be different if you're within the 'Retirement target / lifestyle stage', which normally starts seven years before your selected retirement date.
