Expenses can include costs paid by Aegon to third parties. The fund charges may differ for Retiree (RR) or Aegon One Retirement (AOR).

## About fund performance

Investors should always consider performance in relation to the objective of the fund and over periods of at least five years. If a fund has risen in value, it doesn't mean it is meeting its objective – especially if the fund is aiming to outperform a particular benchmark or meet a risk target. The same applies if the fund has fallen in value.

## Our risk rating

Above average risk funds typically invest in one single investment type or geographical region, for example regional equities (shares) or global bonds. This means that investors are completely exposed to the performance of that single investment type or region. These funds could experience lengthy periods where their value goes down depending on market conditions. However, these funds can also rise in value quite significantly and have historically provided good long-term growth. Because of their narrow investment focus, they're better suited to investors with at least five years to invest and to use in combination with other funds as part of a diversified portfolio.

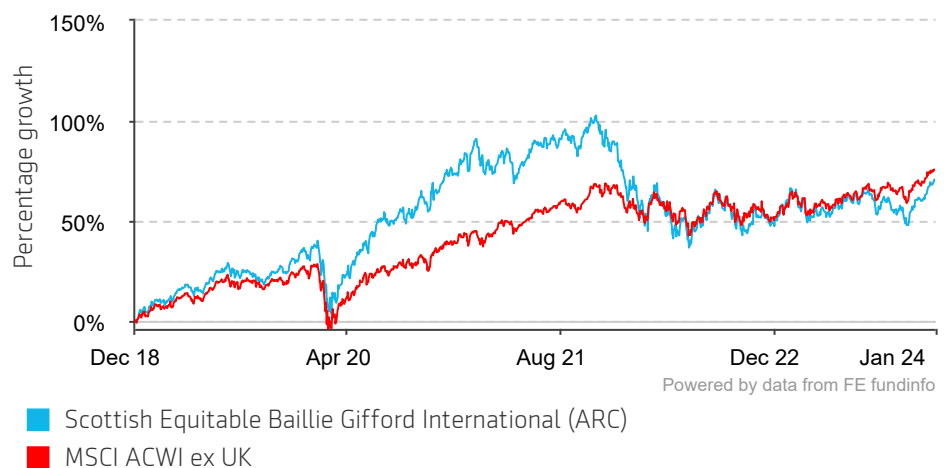

## Fund objective

This fund aims to outperform the MSCI ACWI ex-UK Index by 2% per year (after charges) over rolling 5-year periods by investing at least 90% in a geographically diversified portfolio of companies worldwide, excluding the UK. Its focus is on companies, that in the manager's opinion, offer above average profit and invests in these with a long-term (over 5 years) perspective. The fund will typically hold between 70 to 120 stocks. The Scottish Equitable fund has higher charges than the underlying Baillie Gifford fund and will therefore be less likely to meet this target.

## Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 31 Dec 2023 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.

	1yr	3yrs	5yrs	10yrs
Fund	13.7%	-0.5%	11.3%	12.1%
Benchmark	15.6%	8.1%	11.9%	11.1%
Sector quartile	2	4	2	1

  

	Dec 22 to Dec 23	Dec 21 to Dec 22	Dec 20 to Dec 21	Dec 19 to Dec 20	Dec 18 to Dec 19
Fund	13.7%	-20.2%	8.6%	34.1%	29.2%
Benchmark	15.6%	-8.6%	19.6%	14.0%	22.0%
Sector quartile	2	4	4	1	1

Source: FE fundinfo. The performance information has been calculated in pounds on a bid-to-bid basis and is net of charges with gross income reinvested. Performance for periods over a year is annualised (% per year). Past performance is not a reliable guide to future performance. The value of an investment can fall as well as rise and is not guaranteed. Investors could get back less than they invested.

## Risks specific to this fund

There is no guarantee the fund will meet its objective. The value of an investment can fall as well as rise and investors could get back less than they originally invested. All funds carry a level of risk and the information below outlines the key risks for this fund.

---

**Currency risk** - this fund invests overseas so its value will go up and down in line with changes in currency exchange rates. This could be good for the fund or bad, particularly if exchange rates are volatile.

---

**Third party risk** - in the event that the underlying investments which the fund invests in suspend trading, Aegon may defer trading and/or payment to investors. The value ultimately payable will depend on the amount Aegon receives or expects to receive from the underlying investments.

---
