Unit Launch Date	12.06.14
SEDOL	BMNR1H5
Mid Price	112.00p
Distribution Yield	5.67%
Underlying Yield	5.67%

Overview

The Fund's investment objective is to achieve a total return over rolling 12-month periods by primarily investing in short term fixed income securities. The Fund's performance target is to outperform, before the deduction of charges, the Bank of England Sterling Overnight Interbank Average (SONIA) by 0.50% per annum over rolling 12-month periods. This is the average overnight interest rate UK banks pay for unsecured transactions in sterling and is considered an appropriate benchmark for the Fund's performance.

Year-on-year performance

	31.12.22 to 31.12.23	31.12.21 to 31.12.22	31.12.20 to 31.12.21	31.12.19 to 31.12.20	31.12.18 to 31.12.19

Yield Definitions

The distribution yield reflects the amounts that may be expected to be distributed over the next 12 months. The underlying yield reflects the annualised income net of expenses of the Fund as a percentage (calculated in accordance with the relevant accounting standards). Both these yields are calculated as a percentage of the mid-price of the Fund as at the date shown and are month end snap shots of the portfolio on that day and do not include any preliminary charges. Investors may be subject to tax on distributions. Reported yields reflect RLAM's current perception of market conventions around timing of bond cash flows.

Important Information

This is a financial promotion and is not investment advice.

The Fund is a sub-fund of Royal London Bond Funds ICVC, an open-ended investment company with variable capital with segregated liability between sub-funds, incorporated in England and Wales under registered number IC000797. The Authorised Corporate Director (ACD) is Royal London Unit Trust Managers Limited, authorised and regulated by the Financial Conduct Authority, with firm reference number 144037. For more information on the fund or the risks of investing, please refer to the Prospectus or Key Investor Information Document (KIID), available via the relevant Fund Information page on www.rlam.com.

Issued by Royal London Asset Management Limited, 80 Fenchurch Street, London EC3M 4BY. Authorised and regulated by the Financial Conduct Authority, firm reference number 141665. A subsidiary of The Royal London Mutual Insurance Society Limited.

Please note that the impact of Futures is not considered as part of the overall fund Duration calculation; Fund level Duration is based on long only physical assets (incl cash).

Breakdowns exclude cash and futures.

Fund Commentary

The Bank of England Monetary Policy Committee left interest rates unchanged at the start of February, at 5.25%. Once again, there was a split within the MPC, reflecting the fact that inflation has fallen materially but remains above target. The confirmation later in the month that the UK had entered a recession, albeit a mild one, was not a huge surprise given that growth has been very weak for some time. With interest rates unchanged, SONIA remained at 5.19% over the month. However, expectations of UK rate cuts in 2024 – and in common with expectations in the US and euro zone – have once again been pared back. The further change in 2024 expectations was seen in two-year gilts, often seen as a proxy for market expectations of BoE rates, where yields increased from 4.22% to 4.59%. Aside from overnight deposits, activity focused on reinvesting selectively to longer maturity CDs as on lower expectations of the number of 2024 rate cuts, examples including one-year CDs from Nordea and Credit Agricole, while we also added issue three-year covered bonds from Toronto Dominion at a very attractive premium to SONIA.

This is not a recommendation or solicitation to buy or sell any particular security. The views and opinions expressed herein are those of the manager at the time and are subject to change without notice.

Unit Charges

Key Concepts to Understand

Bonds: Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative: A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management: An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

Money market instruments: Investments that pay interest, have a short duration and are designed to maintain a stable value.

Floating rate notes: Bonds that pay a variable rate of interest. The interest rate is tied to a benchmark and adjusted periodically.

Covered bonds: Bonds or notes that are backed by cash flows from mortgages or other debt.

Fund Risks

Investment Risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk: Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM Techniques: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest Rate Risk: Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Government and Public Securities Risk: The Fund can invest more than 35% of net assets in different Transferable Securities and Money Market Instruments issued or guaranteed by any EEA State, its local authorities, a third country or public international bodies of which one or more EEA States are members.

Inflation risk: Where the income yield is lower than the rate of inflation, the real value of your investment will reduce over time.
