Past performance should not be seen as a guide to future performance. The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations, you may not get back the amount originally invested. This factsheet should not be interpreted as financial advice. If you are unsure which investment is most suited for you, the advice of a qualified financial adviser should be sought.

Yield figures are as at 31/03/2024. Rounding may cause small differences in percentages included in this document.

*Past 12 months' distributions as a % of midshare price, excluding preliminary charge.

**We compare the fund's performance to the iBoxx Sterling Non-Gilt Overall Return Index, however the portfolio manager is not bound or influenced by the index when making investment decisions.

***The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the mid-market unit price of the fund. The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the midmarket unit price of the fund. Both Yields are based on a snapshot of the portfolio on that day. The yields do not include any preliminary charge and investors may be subject to tax on distributions. The Distribution Yield is higher than the Underlying Yield because the fund's expenses are charged to capital. This has the effect of increasing the distributions for the year and constraining the fund's capital performance to an equivalent extent.

†AMC is charged to capital for all share classes of this fund which could constrain the potential growth of your investment.
