iClima Global Decarbonisation Enablers UCITS ETF - Acc

Factsheet | Data as of 30 Sep 2021

Investment Objective

iClima Global Decarbonisation Enablers UCITS ETF (CLMA), is a UCITS compliant Exchange Traded Fund domiciled in Ireland. The fund tracks an Index designed to measure the performance of a global investable universe of publicly listed companies involved in the enablement of CO2e avoidance. The index includes securities from five subsectors including green energy, green transportation, water and waste improvements, decarbonisation enabling solutions and sustainable products.

Why CLMA?

Pure focus on carbon avoidance

CLMA's focus is on the companies that directly enable carbon avoidance in order to reach climate change goals, unlike other ESG or climate change products that might focus on companies reducing their own carbon footprint or lack quantification of potential carbon avoidance.

Regulation and market forces driven mega-trend

Climate change and the transition to a low carbon economy is one of the largest megatrends of the 21st century. Green investments are largely being fuelled by a combination of climate change supportive regulatory changes such as the 2015 Paris Agreement and new consumer-based preferences such as veganism, ridesharing, and electric vehicles.

Balanced and diversified exposure to climate change solutions

CLMA provides balanced exposure to companies providing climate change solutions from five sub-sectors including green energy, green transportation, water and waste improvements, decarbonisation enabling solutions and sustainable products. Each company is capped at 2%, to remove over-exposure to large cap companies.

Key Risks

1. The Fund and the companies in which it invests may be subject to a higher degree of regulatory oversight and regulatory action, which may include a restriction on the types of companies that the Fund may invest in at any time.
2. The Fund may use FDI and hold collective investment schemes and engage in securities lending and receive collateral which may not comply with the screening criteria applied by the Index Sponsor.
3. Investors capital is fully at risk and investors may not get back the amount originally invested.
4. Exchange rate fluctuations could have a negative or positive effect on returns.
5. The value of equities and equity-related securities can be affected by daily stock and currency market movements.
6. Further risks are disclosed in the KIID and Prospectus.
