Z Accumulation GBP | Data as at 29.02.2024

Fund objectives and investment policy

The fund aims to provide capital growth and income in excess of the Bank of America Merrill Lynch Non-Gilts (Gross Total Return) index (after fees have been deducted) over a 3 to 5 year period by investing in bonds issued by companies worldwide.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID. Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

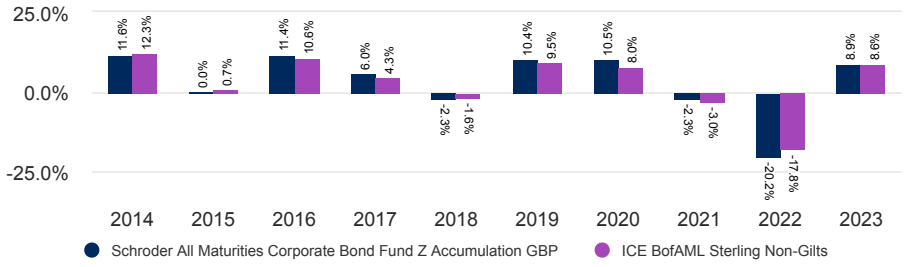

Share class performance (%)

SEDOL	B4V0R05

10 year return of GBP 10,000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.
Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Capital erosion: As a result of fees being charged to capital, the distributable income of the fund may be higher, but there is the potential that performance or capital value may be eroded.
Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.
Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.
Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.
Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.
High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.
IBOR risk: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference interest rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.
Interest rate risk: The fund may lose value as a direct result of interest rate changes.
Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.
Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.
Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.
Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Synthetic risk & reward indicator (SRRI)

LOWER RISK Potentially lower reward — **HIGHER RISK** Potentially higher reward

1	2	3	**4**	5	6	7

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Risk statistics & financial ratios

	Fund	Target
Annual volatility (%) (3y)	10.0	9.2
Effective duration (years)	5.7	-
Current yield (%)	5.0	-
Yield to maturity	6.0	-

Source: Morningstar. The above ratios are based on bid to bid price based performance data. Please note this is an accumulation share class and as such the investor will not receive an income distribution. Any income will be reinvested into the fund.

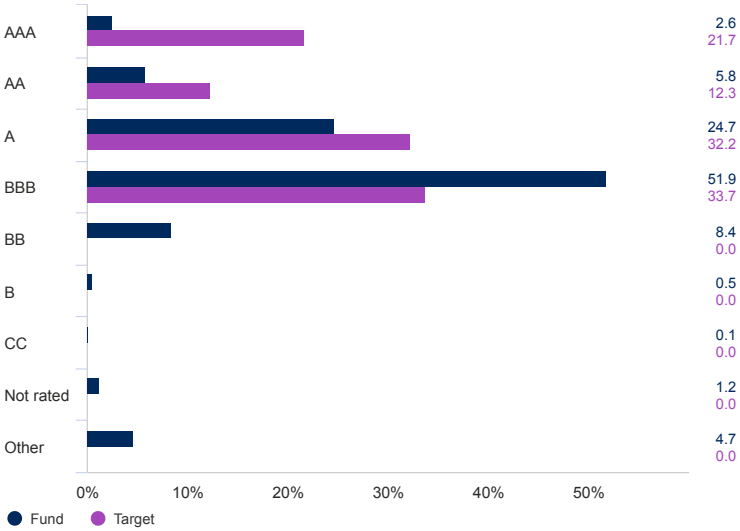

Asset allocation

Target refers to the Benchmark listed in the Fund facts section and described under the Share class performance section on page 1.

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

On 01.07.2017 the ICE BofAML Non-Gilts (GBP) replaced the ICE BofAML Non-Gilts All Stocks. The full track record of the previous index has been kept and chainlinked to the new one. The A unit class performance is simulated and based on the gross returns of existing units at launch date of the fund, with the Z unit fee overlayed. Although this unit class launched on 27.02.2009, we believe this performance to be fully representative of the returns an investor would have received has this unit class been available over the period. Please note that this fund, previously named Schroders Corporate Bond Fund (PFPV), was converted into an Institutional AUT as of the 24.03.2005. Please note that this fund, previously named Schroders Corporate Bond Fund (PFPV), was converted into an Institutional AUT as of the 24.03.2005. Although this unit class launched on 27.02.2009, we believe this performance to be fully representative of the returns an investor would have received has this unit class been available over the period.

Benchmarks: (If applicable)
Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Important information

Costs:
Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund's performance fee benchmark, which may differ from the benchmark in the fund's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds' offering documents and annual report.

General:
The fund is an authorised unit trust. A Key Investor Information Document and Supplementary Information Document are available.
