# ACUMEN

## Portfolio 6

FACTSHEET  
November 2021

### INVESTMENT POLICY

ACUMEN Portfolio 6 will be actively managed, on a high medium risk strategy. This model has an internal risk rating classification of 6 and will aim to maintain this risk rating classification. The risk rating range is from 1 (lowest risk) to 10 (highest risk). This range is utilised across the whole of our investment proposition. The portfolio will invest in a number of different asset classes across global markets, including shares in companies, bonds, property and commodities. The asset class exposure over an investment cycle will broadly reflect the Benchmark as defined below.

### INVESTMENT OBJECTIVE

The aim of the Portfolio is to increase in value, over a minimum of 5 years, by investing in a range of asset classes and global markets. This will be achieved through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments such as dividends from shares and interest from bonds.

### ABOUT TITAN ASSET MANAGEMENT

Titan Asset Management manages over £1bn of assets on behalf of all clients. We aim to provide private clients with access to institutional quality portfolio management at a retail price. Titan Asset Management Limited is a wholly owned subsidiary of Titan Wealth Holdings Limited.

### ACUMEN PORTFOLIOS

The ACUMEN Portfolios are low cost sub-funds of the ACUMEN OEIC and are comprised of index tracking ETFs. The portfolios provide multi-asset, global coverage with wide diversification across equity, bond, commodity and property markets. The portfolios are regulated to the "gold" standard of European regulation - UCITS compliant.

### INVESTMENT PHILOSOPHY

The fund management industry has experienced significant change in the last quarter of a century. Product innovation has enabled investors to benefit from wider exposure to global financial markets with far greater efficiency and at a lower cost. Index-tracking investments such as Exchange Traded Funds have grown increasingly important and form the building blocks for all investments managed by Titan Asset Management. We believe an actively managed, globally allocated, multi-asset portfolio, comprised of low-cost ETFs with diversified holdings in equity, bond, commodity and property markets is statistically more likely to outperform a traditional "stock picking" manager most of the time.

### BENCHMARK

IA Sector - Mixed Investments 40%-85% Shares.

### INVESTMENT TEAM

John Leiper, CFA, CFTe, is the Chief Investment Officer of Titan Asset Management and carries direct responsibility for all discretionary investments at the firm. Together with the portfolio management team, they manage the risk progressive range of ACUMEN Portfolios.

## MANAGER COMMENTARY

Despite a strong start to the month, global equity indices suffered on the back of growing inflation, a more hawkish Fed and rising uncertainty around the new "Omicron" Covid-19 variant. In Europe, several countries including Germany and Slovakia imposed fresh lockdowns on the unvaccinated after a surge in cases, with some regions in Austria extending restrictions to the vaccinated. Risk assets suffered, with the MSCI world index down -2.30% for the month while the MSCI emerging markets fell -4.14%. Turning to the economic data, the US reversed its recent negative trend with surprises to the upside in manufacturing PMIs, employment and retail sales. In a surprise change of policy, the Reserve Bank of Australia began the month by abandoning their yield curve control policy causing the 2-year sovereign bond yield to spike dramatically. Conversely, the Bank of England Monetary Policy Committee surprised markets by not hiking rates by the expected 15bps. Sterling suffered, relative to its developed market counterparts, depreciating by as much as 1.50% on the day and 2.80% over the month versus the US dollar. Nonetheless, the market is still pricing in a 100% probability of a hike at the February meeting. Bank of England governor Andrew Bailey confirmed that interest rates "need to", and "will", rise. The hawkish central bank sentiment carried over to the US where, the newly re-appointed Jerome Powell said that the \$15bn-per-month taper of the Fed's asset purchases announced earlier in the month could be accelerated. The move was supported by Mary Daly, President of the Federal Reserve Bank of San Francisco, who is widely considered one of the most dovish members of the FOMC, and came on the back of the strong headline inflation number, which surged to its highest rate in over three decades, at 6.2%. In commodities, the S&P Goldman Sachs commodity index fell -11.18%, largely driven by a -20.81% fall in the price of WTI crude.
