Benefits

The fund's investment weightings can be flexibly adjusted in line with the latest market expectations.

The broad weighting ranges give the portfolio managers considerable scope to exploit attractive opportunities.

An efficient portfolio with an optimised risk-return profile can be put together thanks to its global diversification and high flexibility.

Risks

Equity risk: Equities (also known as shares) can lose value rapidly and typically involve higher risks than bonds. Interest rate risk: the value of fixed rate bonds is sensitive to changes in interest rates. Counterparty risk: counterparties on trades may default or not comply with contractual obligations resulting in loss. Exchange rate risk: the value of investments may be impacted by changes in the exchange rates of currencies. Bond risk: Bonds (also known as fixed income securities) are impacted by Credit risk and are sensitive to changes in interest rates and expectations of future inflation. Bonds that produce a higher level of income usually have a greater risk of default. Credit risk: A bond or security could lose value if the issuer's financial health weakens. This risk is greater for bonds below investment grade (also known as high yield). Derivatives risk: derivatives can be highly sensitive to changes in the value of the asset on which they are based which can increase the size of losses and gains. Liquidity risk: securities may become more difficult to sell or sell at a desired price during difficult market conditions. Emerging market risk: investments in emerging markets can be at greater risk of loss than in developed markets. Leverage risk: leverage arising from entering into derivatives contracts has the effect of magnifying profits and losses.

Important information

Past performance is not a guide to future performance. The value of investments and the income from them may go down as well as up and are not guaranteed. Investors may not get back the amount originally invested. Changes in rates of exchange may cause the value of this investment to fluctuate. The Sustainability Exclusion Policy of the Investment Manager outlines the exclusions applicable to the investment universe of the Funds: <https://www.ubs.com/global/en/asset-management/investment-capabilities/sustainability.html>. In addition, the controversial weapons exclusion applies to all UK domiciled funds. The information contained in this document should not be considered a recommendation to purchase or sell any particular security and the opinions expressed are those of UBS Asset Management and are subject to change without notice. This document is a marketing communication. Any market or investment views expressed are not intended to be investment research. The document has not been prepared in line with the Financial Conduct Authority requirements designed to promote the independence of investment research and is not subject to any prohibition on dealing ahead of the dissemination of investment research. Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary. If you are in any doubt on the features of this product, or its appropriateness for your needs, please seek financial advice. Private Investors: For any complaints, please contact InformationServices@ntrs.com. Institutional Investors: Please raise any complaints directly with your UBS contact, Client Relationship Manager or Client Advisor.

Glossary of key terms

Benchmark

Index against which an investment fund's performance is measured. Also called a reference index.

Beta

A measure of risk which indicates the sensitivity of an investment, such as an investment fund, to fluctuations in the market, as represented by the relevant benchmark. For example, a beta of 1.2 tells us that the value of an investment fund can be expected to change by 12% if the market is forecast to move by 10%. The relation is based on historical data and is only an approximation. However, the closer the correlation between the benchmark and the investment fund, the better this approximation.

Correlation

A measure of the degree to which the price trends of various investment categories or instruments move in the same direction. The correlation quantifies the strength of the relationship as a figure between -1 and $+1$. The closer the coefficient is to 1, the stronger the correlation. If the coefficient is -1 , the investments and the benchmark move in opposite directions. If the value is 0, there is no correlation.

Duration

The duration represents the length of time for which capital is "tied up" in a bond investment. In contrast to residual maturity calculations, the concept of duration takes account of the time structure of returning cash flows (such as coupon repayments). The average duration of the portfolio is derived from the weighted average duration of the individual securities. The "modified duration" is derived from the

duration and provides a measure of the risk with which the sensitivity of bonds or bond portfolios to interest-rate changes can be estimated. A 1% increase (decrease) in the interest level accordingly produces a percentage fall (rise) in the price in proportion to the modified duration. For example: the modified duration of a bond fund is 4.5, the theoretical yield to maturity is 5.3%. If the theoretical yield to maturity drops in the example by 1% to 4.3% due to the decline in interest rates, the fund price increases by around 4.5%. For bond and asset allocation funds, the duration is given for all fixed-income instruments.

Investment grade

Term used to denote securities with ratings of between BBB and AAA, indicating that their credit quality is satisfactory or good.

Sharpe ratio

The Sharpe ratio expresses how much higher (or lower) a return an investor can expect compared to the risk-free rate of interest (e.g. interest rates on savings accounts) per unit of risk (volatility). The risk-free rate of interest varies from currency to currency.

Tracking error

Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error.

This communication is approved and communicated by UBS Asset Management (UK) Ltd, authorized & regulated by the Financial Conduct Authority and does not constitute investment advice. Prospectuses, key investor information documents (KIID), the articles of association or the management regulations as well as annual and semi-annual reports of UBS funds are available free of charge from UBS Asset Management (UK) Ltd, 5 Broadgate, London, EC2M 2QS. The fund documentation is available free of charge in English and, where relevant, in one of the local language(s) where the fund is registered and online at www.ubs.com/funds. The benchmark is the intellectual property of the respective index provider. The fund or the share class is neither sponsored nor endorsed by the index provider. The fund prospectus or supplemental prospectus contains the full disclaimer. Before investing in a product please read the latest prospectus and key information document carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the fund as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future.
