OCTOBER 2021 / FACTSHEET

OBJECTIVE

The investment objective of the Barings Japan Growth Trust is to achieve long-term capital growth by investing in equities in Japan.

STRATEGY

The Fund invests in a concentrated portfolio of Japanese stocks from across the market capitalization spectrum, particularly focusing on quality Growth companies, with the aim of achieving superior risk-adjusted returns.

MARKET OPPORTUNITY

- Improving corporate governance standards among Japanese companies set to enhance profitability and returns.
- A tightening Japanese labor market is creating opportunities in outsourcing operations, technology and factory automation companies.
- Financial liberalisation and deregulation set to drive structural growth opportunities.

FUND PERFORMANCE (%)	Class A GBP Acc (Gross of Fees)	Class A GBP Acc (Net of Fees)	Benchmark ¹

*Please refer to prospectus for additional currency class information.

Key Risks:

- Country specific funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Barings Japan Growth Trust A GBP Acc share class was rated against the following numbers of EAA Fund Japan Large-Cap Equity investments over the following time periods: 971 investments in the last three years, 783 investments in the last five years, and 514 investments in the last ten years.

Past performance is no guarantee of future results.

Morningstar Rating is for the A share class only; other classes may have different performance characteristics.
