PERFORMANCE BENCHMARK

The Fund will measure its performance against the Russell 3000 TR Index as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because it includes a broad representation of the asset classes, sectors and geographical area in which the Fund predominantly invests.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.
- If this share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
