Performance information

Prior to 15/01/04 the performance record is of the predecessor company J.P. Morgan Fleming Managed Income plc.
Source: J.P. Morgan Asset Management/Morningstar. Net asset value performance data has been calculated on a NAV to NAV basis, including ongoing charges and any applicable fees, with any income reinvested, in GBP.
NAV is the cum income NAV with debt at fair value, diluted for treasury and/or subscription shares if applicable, with any income reinvested. Share price performance figures are calculated on a mid market basis in GBP with income reinvested on the ex-dividend date. The performance of the company's portfolio, or NAV performance, is not the same as share price performance and shareholders may not realise returns which are the same as NAV performance.
Indices do not include fees or operating expenses and you cannot invest in them.
Prospective dividend yield is for the investment trust's current financial year. It is indicative only and based on the latest month end mid-market price and the declared and net prospective dividends for the current financial year.

Definitions

FE Crown rating are quantitative ratings ranging from one to five designed to help investors identify funds which have displayed superior performance in terms of stockpicking, consistency and risk control.

FE Crown Fund Ratings are however purely quantitative and backward looking, and, as such, cannot offer any certainty about the future.

FE Trustnet crown rating as at 30 November 2022.

Benchmark comparison Comparison of the Company´s performance is made with the benchmark. The benchmark is a recognised index of stocks which should not be taken as wholly representative of the Company´s investment universe. The Company´s investment strategy does not follow or track this index and therefore there may be a degree of divergence between its performance and that of the Company.
Gearing Gearing represents the excess amount above shareholders´ funds of total investments (excluding liquidity fund holdings) expressed as a percentage of the shareholders´ funds. If the amount calculated is negative, this is known as a "net cash" position.
Discount/Premium If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. If the share price of an investment company is higher than the net asset value (NAV) per share, the company is said to be trading at a premium. The discount/premium is shown as a percentage of the NAV.
NAV The value of investment and cash, including current year revenue, less liabilities (prior charges such as loans, debenture stock and preference shares at fair value).
Cash A company's net exposure to cash / cash equivalents [includes investment in liquidity funds and treasury stocks if held] expressed as a percentage of shareholders funds after any offset against its gearing.
