## MGTS Future Money Income Fund

### >Objective

The Sub-fund is intended to provide increasing income (measured by annual monetary gross distributions per share per annum) and a total return after fees of at least the rate of inflation, measured by the UK Consumer Price Index (CPI), plus 1% (per annum) over any five-year period. For these purposes, total return means the amount of capital and income an investor earns.

### >Performance

UK CPI plus 1% is the target benchmark for investors to compare the performance of the fund against its objective over the objective timeframe above. The Sub-fund is designed to grow the real value of an investment over the long term, which means that the growth should be at least equal to the rate of inflation, although this is not guaranteed and capital is at risk.
