Fund description

Investment objective and overview

The investment objective of the Fund is to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), Fixed Income Securities (with no restriction on the minimum credit rating), property, commodities and currencies.

Opportunities

The Fund invests in a broadly diversified investment universe and seeks opportunities for returns wherever they exist. The objective is to identify the potential investments that, in the Investment manager's opinion, are attractive and could generate positive opportunities for investors. A highly qualified and experienced management team actively manages the Fund on the basis of a fundamental valuation approach.

Risk factors

**Capital at Risk:** all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed.

**Credit Risk / Debt Securities:** bonds may be subject to significant fluctuations in value. Bonds are subject to credit risk and interest rate risk.

**Currency Risk - Non Base Currency Share Class:** non-base currency share classes may or may not be hedged to the base currency of the Fund. Changes in exchange rates will have an impact on the value of shares in the Fund which are not denominated in the base currency. Where hedging strategies are employed, they may not be fully effective.

**Liquidity Risk (Fund of Funds):** investments in other funds are subject to the liquidity of those underlying funds. If underlying funds suspend or defer payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

**Operational Risk / Third Parties:** investments in other funds have direct and indirect dependence on other service providers. The Fund may suffer disruption or loss in the event of their failure.

**List Not Exhaustive:** This list of risk factors is not exhaustive. Please refer to the relevant Fund's Prospectus.

Fund: GAM Star Global Balanced Institutional GBP Acc Benchmark: Lipper Global Mixed Asset GBP Balanced in GBP

Past performance is not an indicator of future performance and current or future trends. The performance values refer to the net asset value and are calculated without the commission and costs incurred on issue, redemption or swapping (e.g. transaction and custody costs of the investor). The fund does not include the security of capital which is characteristic of a deposit with a bank or building society. The indications are based on figures denominated in GBP. If this currency is different from the currency of the country in which the investor is resident, the return may increase or decrease as a result of currency fluctuations. Indices cannot be purchased directly.

## Glossary

**Ongoing charge:** the ongoing charge is a measure of the annual expenses incurred by a fund and is expressed as a percentage. It allows an accurate comparison of the costs of funds from different companies to be made.

**Risk rating:** The summary risk indicator is a combination of a market risk measure and credit risk measure. The market risk measure is based on an annualized volatility measure, calculated over the last 5 years of history if available. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate. This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. The credit risk measure is assessing credit and concentration risk within the portfolio. The indicators are not guaranteed and may shift over time. The lowest category does not mean 'risk free'.
