Invesco UK Equity High Income Fund (UK)

Z-Accumulation Shares | SEDOL B8N46L7 | ISIN Code GB00B8N46L71 | Bloomberg code INHIZRA:LN

Why invest in this fund

1. We follow an active, valuation-focused, bottom-up approach, where company fundamentals are of central importance.
2. Our fund invests in good quality, undervalued businesses, with individual stock selection particularly focused on companies with strong cash generation which can generate a good, well-diversified stream of income that is well covered by earnings and can grow.
3. Our fund is actively positioned across a range of sectors, in companies that we believe can flourish in different economic environments.

What this fund does

The fund managers pursue an active investment approach, which is based on individual stock selection, with a particular focus on cashflow generation and business fundamentals. The fund managers seek to identify undervalued businesses that can be combined in a portfolio so as to deliver total return weighted to income and with a target yield higher than the FTSE All-Share index. The fund managers have a flexible and pragmatic approach, whilst the fund has no inbuilt sector, or style bias. The fund managers remain convinced that, in a changing global environment, the interests of investors are best served by employing a disciplined, repeatable investment process, which is based on fundamental company analysis, a prudent approach to valuation, with challenge built in at each stage. They continue to evaluate and re-evaluate the holdings in the portfolio, seeking the best opportunities consistent with the objectives of the fund, to create value for investors.

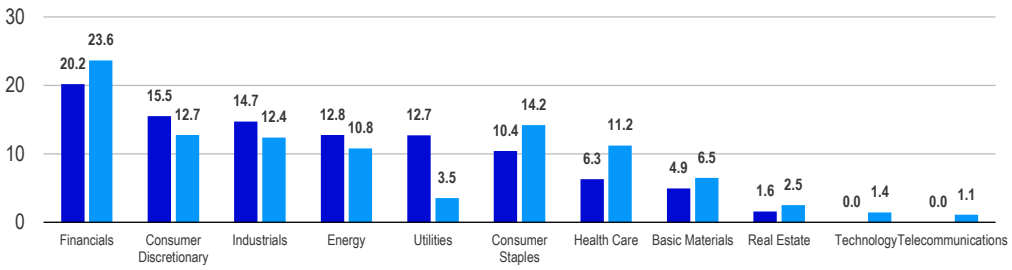

Fund objective

The Fund aims to achieve a high level of income (greater than the income return of the FTSE All Share Index over a rolling 5 year period) and capital growth over the long term (5 years plus). The Fund invests at least 80% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including private and unlisted equities and non UK companies), money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash.

Sector breakdown (% of total net assets)

Top countries (% of total net assets)

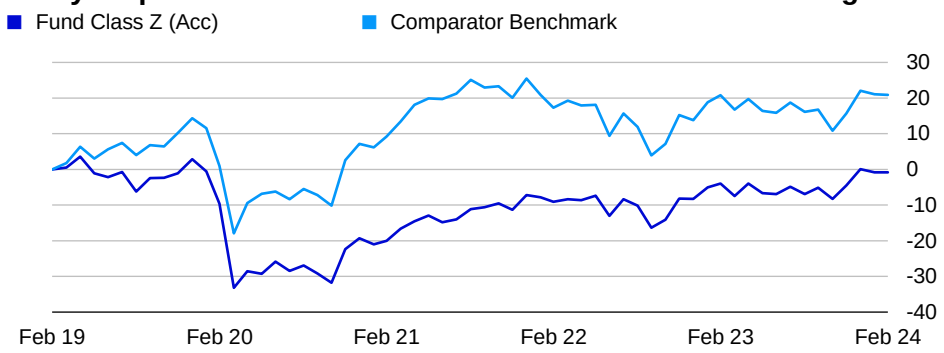

The allocation of stock is based on Country of Risk

Investment risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.
- As one of the key objectives of the Fund is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.
- The Fund is invested in companies primarily domiciled in one country, any unfavourable conditions presented on them through country-specific conditions such as changes in regulation, business or economic policy may have a more negative impact on the Fund's performance than on the performance of a Fund that is geographically diversified.
- The Fund may invest in private and unlisted equities which may involve additional risks such as lack of liquidity and concentrated ownership. These investments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that any investments in private and unlisted equities do not materially alter the overall risk profile of the Fund.

Five year performance

Performance figures are based on the Z Accumulation share class. Performance figures for all share classes can be found in the relevant Key Investor Information Document. Fund performance figures are shown in sterling, inclusive of reinvested income and net of the ongoing charge and portfolio transaction costs to 29 February 2024 unless otherwise stated. Sector average performance is calculated on an equivalent basis. The standardised past performance information is updated on a quarterly basis. Source: Lipper.

Benchmark

Target Benchmark: The Fund's income target can be measured against the income return of the FTSE All Share Index (Net Total Return).

Comparator Benchmark: Investment Association UK All Companies Sector.^

Given its geographic focus the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark, including the Target Benchmark or the Comparator Benchmark.

^ Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to facilitate comparison between funds with broadly similar characteristics.

Authorised and regulated by the Financial Conduct Authority.

Who is this fund for?

The fund might be right for you if you:
Are a private or professional investor looking for income and growth over the long term.
Are able to make an informed investment decision based on this document and the Key Investor Information Document (KIID).
Are willing to accept that your capital is at risk and you may not get back the amount invested.
The fund will not be right for you if you:
Require capital protection or have no appetite for risk.

Cost and charges of the Fund

For a full breakdown of the charges that apply to each share class of the fund, please refer to our ICVC Costs & Charges document www.invesco.com/uk/icvc-charges.

Glossary

ACR/ Annual Compound Return: Compound returns represent the cumulative effect that gains and losses have on invested capital over time. Annual Compound Return is the annual rate of return that would be required for an investment to grow from its starting balance to its ending balance.
Asset mix: Breakdown of all assets types held within an investment fund or portfolio.
Benchmark: A standard against which an investment fund or portfolio is measured to give an indication of relative performance.
Country of risk: Used to classify stocks, identifies the main country of operations/ exposure of a firm.
Distribution frequency: How often dividends and/or interest generated by an investment product are disbursed to investors.
Historic yield: Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market price of the fund, as at the date shown. Investors may be subject to tax on their distributions
Holdings: The contents of an investment portfolio or fund, including any products like equities, bonds or ETFs.
ICVC: Investment Company with Variable Capital. A type of collective investment portfolio that invests in different equities, bonds and other securities.
Index: A collection of stocks chosen to represent the performance of a particular market or sector, e.g. FTSE 100 or S&P 500.
Market capitalization: How much a company is worth as determined by the stock market. Calculated as the total market value of all shares.
Portfolio characteristics: The contents of an investment portfolio or fund, including any products like equities, bonds or ETFs (Exchange Traded Funds).
